Subject Index, 2015

acapsular mutants
  complementation of, 87
  effect of Avibacterium paragallinarum capsule, 87

Aviarethes tristis
  characterization of avian influenza virus in Oman, 329
  adherence activity
  increased by Avibacterium paragallinarum, 87
  adjuvant
  mixture of PCEP and ABD2 against BH
  Salmonella Gallinarum live vaccine, 537

aerosol disinfectant
  inactivation of viruses in the air, 486

aerosol inoculation
  H9N2 avian influenza virus in chickens, 263

Alabama
  black fly outbreaks, in Mississippi River Delta, 24
  Clostridium perfringens toxins netB and-speL, 46

Algeria
  cephalosporin-resistant APEC, in, 20
  E. coli strains resistant to cephalosporins, 20
  multiple respiratory infections in poultry flocks, 440

Anderson, David, 1

antigens, target
T- and B-cell target antigens, 249

antimicrobial susceptibility patterns
  found in poultry flocks in Germany, 143
  most-frequent resistance patterns of E. faecalis, 143

apolipoprotein
  changes in lipoproteins, 349

Ark-vaccines
  inadequate protection or contributor, 106

ascorbic acid
  effects to E. coli in turkeys with differing genetics, 323
  assay
  biofilm formation, 87
  cell adherence, 87
  DIVA TaqMan PCR, 7
  hemagglutination, 87
  TaqMan qPCR, 7

astrovirus
  age-related susceptibility of turkeys to infection, 207

avian beta defensin (ABD)
  used as an adjuvant, 518
  Avian Diseases journal
  history and creation of, 1

avian hepatitis E virus
  detection and characterization of avian HEV, 388

avian hosts
  persistence of Trichomonas gallinae in water, 472
  avian influenza, risk factors of
  Important Bird Areas (IBA), 64
  interspecies transmissions via pigs, 64
  migratory waterbirds in Uganda, 64
  non-wetland dependent bird groups, 64
  poultry from village to village or to market, 64
  exposure risk of wild waterfowl, 492

avian influenza virus
  Australia, northern, exposure risk, 492
  autogenous AIV (H9N2) vaccine efficacy, 508
  characterized in wild mynah birds in Oman, 329
  H5 and H7 circulation, retrospective analysis, 543
  H1N1 and H3N8 AIV, differentiation of, 498
  H5N8, natural cases in South Korea, 175
  H5N8 outbreak in a Japanese quail commercial flock in California, 344
  outbreak in a Japanese quail commercial flock in California, 344
  pH1N1 in turkey breeders, 171
  respiratory co-infections, 440
  viral respiratory infections in poultry species in Libya, 422
  avian malaria
  collective causes, 24
  avian metapneumovirus
  respiratoryco-infections, 440
  avian reovirus (ARV) infection
  Tunisian strains, genotyping and classification of, 14

Avibacterium paragallinarum
  function of the capsule, 87
  NAD-independent isolate in broilers with coryza, 341
  vaccine protection against Av. paragallinarum serovar C-1, 162

ß-nicotinamide adenine dinucleotide (NAD)
  independent isolate of A. paragallinarum causing coryza in broilers, 341
  backyard poultry
  antigen detection of fowlpox virus in India, 249
  bacterial ghost
  controlled expression of PhiX174-derived lysis gene E, 269
  for treatment of Salmonella Gallinarum, 269
  SG ghost, enhanced biomass production of, 269

bacteriotherapy
  for broilers with RSS, 201

B-cell antigen
  fowlpox virus infected backyard poultry, India, 249

Belgium
  analysis of serological survey in Belgian poultry, 543
  biomarkers
  serum metabolites to screen for FHN, 349
  biomass production
  of Salmonella Gallinarum ghost increased, 269
  biosecurity
  aerosol disinfectants, application of, 486
  validation of poultry manure drag swabs, 548
  bird baths
  persistence of Trichomonas gallinae in water, 472

bicornaviruses
  predilection for the bursa of Fabricius, 114
  chicken poxvirus (CPNV), 384
  bivalent recombinant vaccine
    for laryngotracheitis and Marek’s Disease, 255
  black fly
    fly strips, easily trapped on, 24
    outbreaks of, in Mississippi River Delta, 24
    bla-CTX-M gene, group 1
    APEC strains in Algeria, in, 20

Bordetella avium
  chickens and turkeys, in, 130
  botulinum neurotoxin type C/D
    causing botulism outbreak in laying hens, 335
  botulism
    outbreak in laying hens cause by C. botulinum type C/D, 335

Brazil
  Eimeria spp. prevalence in broilers, 277

breast muscle, avian
  morphological structure and cell biology of, 525

breeders
  avian reovirus (ARV) infection, detected in Tunisia, 14

broilers
  artificial Salmonella infection in, 74
  ARV infection, Tunisia, 14
  Campylobacter infection, 185
  CpG-ODN effect against an E. coli infection, 31
  Eimeria and fishmeal, in, 38
