
Albert, S. & A. Arya. 2008. Anatomical studies on Roccella belangeriana—a lichen growing on Ceriops tagal. Journal of Mycology and Plant Pathology 38(3): 485–487. [Authors give a brief description which includes details and photographs of the thallus, apothecium and pycnidia. The presence of pycnidia is interpreted as “… a three membered symbiotic relationship, i.e. between one algal and two fungal components.”]

Aptroot, A. 2009. Lichens as an indicator of climate and global change. Pages 401–408. In T. M. Letcher (ed.), Climate Change: Observed Impacts on Plant Earth. Elsevier B. V., Amsterdam. 492 pp. [Literature review and synthesis. “Lichens are unequivocally responding to global change.” Effects so far most pronounced temperate regions as well as the Arctic areas. “The most severe effects of climate change, leading to probably extinctions, is expected (but has not been observed as yet) on high mountains in tropical regions.”]

———, ———, E. Fischer, D. Killmann & E. Sérusiaux. 2009. The lichen genus Pertusaria (Ascomycota) in Central Africa (Congo/Kivu, Rwanda and Burundi) and western Kenya. Nova Hedwigia 88(3–4): 309–333. [Treatment of 21 spp., 13 new to Africa; key. New: P. kingiensis sp. nov. (on rocks in Rwanda and Burundi), P. krogiae sp. nov. (on bark in Rwanda and Kenya) and P. lambinonii sp. nov. (Congo, Rwanda and Burundi on rocks). Authors also include notes on 4 other African Pertusaria taxa.]

Armstrong, R. A. 2009. Monthly fluctuations in radial growth of individual lobes of the lichen Parmelia conspersa (Ehrh. ex Ach.) Ach. Symbiosis 47: 9–15. [Study over 22 months in Wales. “Growth fluctuations were correlated with climatic variables in 31% of lobes, most commonly with either total

* The cumulative database for this series is available in searchable form on the World Wide Web at http://www.nhm.uio.no/botanisk/bot-mus/lav/sok_rll.htm. I owe special thanks to Bill Buck for providing copies of papers by other authors, which were otherwise unavailable to me, and to the cooperating authors who send reprints or electronic versions of their works to me for inclusion in this series.
