Aims and Scope of the Journal of Coastal Research (JCR)

Journal of Coastal Research (JCR), an International Forum for the Littoral Sciences, is dedicated to all aspects of coastal research. These include geology, biology, geomorphology (physical geography), climate, littoral oceanography, hydrography, coastal hydraulics, environmental (resource) management, engineering, and remote sensing. Although each field functions effectivelywithin itsownpurview, the cross-disciplinarynature of coastal studies requires familiarity with other fields as well. Hence, the scope of topics is necessarily broad in order to address the complexity of coastal biophysical and socio-economic interactions. Because of the wide range of interrelated topics, the journal invites original contributions and manuscripts dealing with theory, methodology, techniques, and field or applied topic studies on interdisciplinary coastal issues.

The journal encourages the dissemination of knowledge and understanding of the coastal zone by promoting cooperation and communication between specialists in different disciplines. Natural scientists, for example, are encouraged to collaborate with professionals in other fields to prepare contributions relating to the coastal zone that foster increased appreciation of coastal environments and processes. By means of this journal, with its scholarly and professional papers, systematic review articles, book and symposia reviews, communications and news, and special topical issues, an international forum for the development of integrated coastal research is provided.

Advertising, Editorial, and Subscription Information

Advertising and Editorial Office: All advertising and editorial correspondence should be sent to Dr. Chris Makowski, Editor-in-Chief, Journal of Coastal Research, 7570 NW 47th Avenue, Coconut Creek, FL 33073, U.S.A. PHONE: (+1) 954-899-8416. E-MAIL: cmakowski@cerf-jcr.com WEBSITE: www.cerf-jcr.org

Subscription Information: The Journal of Coastal Research is a bimonthly publication. Calendar-year (2021) print and online subscription prices for the JCR are: \$115.00 for US CERF members / \$125.00 for International CERF members (\$95.00 for online only), and \$519.00 for US institutions / \$541.00 for International institutions (\$437.00 for online only). Additional surface charges may apply to subscribers located outside of the USA. For additional membership and subscription forms and information, please go to www.cerf-jcr.org. To obtain a membership or subscription form by mail, please send request to Journal of Coastal Research, P.O. Box 7065, Lawrence, KS 66044. Back Issues and Special Issues of the JCR, when available, can be directly requested at: cerf.jcr@gmail.com.

Abstracting Information: The Journal of Coastal Research (JCR) is currently surveyed in: Web of Science (WoS) Core Collection / Web of Knowledge (Clarivate Analytics); Science Citation Index Expanded; SCOPUS (Elsevier); BioOne Complete; JSTOR; EBSCO; ProQuest; Charlesworth; BIOSIS Previews; Zoological Record; Biological Abstract; H.W. Wilson Company; Thomson Reuters (ISI); Cabells Scholarly Analytics; Essential Science Indicators; Chemical Abstracts Service (CAS); Gale Group (Gale / Cengage Learning); Copyright Clearance Center, Inc. (CCC); Current Contents - Physical, Chemical & Earth Sciences; and Current Contents - Agriculture, Biology & Environmental Sciences.

COVER PHOTOGRAPH

Rock Beauty Angelfish on Shark Bend Reef, Pompano Beach, Florida, U.S.A. The rock beauty angelfish (Holacanthus tricolor) is a fish species associated with clear, shallow reef habitats of the tropical western Atlantic Ocean. It can be found from Bermuda to the Bahamas and from Florida down to southeastern Brazil. Their diet consists mainly of sponges, but they have been known to occasionally feed on planktonic animals, small invertebrates, coral, tunicates, algae, and even mucus secreted from other fish. It has a flat, oval black body with trailing black dorsal and anal fins (with yellow and orange margins), a yellow tail, and a yellow face with a black mouth. The juvenile is almost completely yellow, with a black spot on either side that grows slowly to cover most of its body. The lobes of the dorsal, anal, and pectoral fins produce into long filaments as the fish ages. Identification of the rock beauty is based upon the distinctive coloration rather than body morphology. They are most commonly harvested for the aquarium trade, even though their specific diets and territoriality make them a difficult species to keep in captivity.

The behavior of this reef fish is rather unique, as it is extremely territorial, rarely leaving the small radius around its immediate home area. It also develops a long-term monogamous breeding relationship pair with a mate. Often these pairs consist of a large individual and a small individual, perhaps suggesting a sexual dimorphism that may exist within this species. There is, however, no difference in the coloration between the male and female. The pair mates by rising slowly up in the water column, bringing the bellies close together, and releasing large amounts of sperm and eggs into the water. The female can release anywhere from 25,000 to 75,000 eggs each evening, and as many as ten million eggs during each spawning cycle. The eggs are transparent, spherical, and pelagic, each containing a single droplet of oil to provide buoyancy, and hatch in 15 to 20 hours after fertilization. The young enter a sort of pre-larval stage, where they lack functional eyes, fins, and a gut. At this stage, the larvae are still attached to a large yolk sac. The yolk is absorbed within two days, during which time the young become fully functional and free swimming larvae. Growth is then rapid and three to four weeks after hatching, the juvenile rock beauty settles on a spot upon the reef where it will most likely remain its entire life. (Photograph taken September 2020 by Chris Makowski, Coastal Education and Research Foundation (CERF-JCR), Coconut Creek, Florida, USA.)

CERF-JCR Society Information

The Coastal Education and Research Foundation (CERF) is a non-profit research society dedicated to the advancement of the coastal sciences and serves as the official publisher of the international Journal of Coastal Research (JCR). CERF-JCR is devoted to the multi-disciplinary study of complex problems related to the coastal zone. Our purpose is to help in the translation and interpretation of coastal issues for the public and to assist professional and academic research programs by supporting and encouraging field and laboratory studies on a local, national, and global basis. Through printed scientific publications, current online content, and renowned international symposiums, CERF-JCR brings accurate information to both the public and researchers alike on all aspects of coastal issues in an effort to maintain and improve the quality of shoreline resources.

The Journal of Coastal Research (JCR) is one of the leading international journals for coastal studies and processes, and is published bi-monthly by the Coastal Education and Research Foundation (CERF). By covering the entire field of coastal research, the JCR encompasses all subjects relevant to natural and engineered environments (i.e. freshwater, brackish, or marine) and the protection/management of their resources in the vicinity of coastlines around the world. Even though the journal broadly focuses on immediate shoreline zones, the JCR also embraces those coastal environments that either reach some indefinite distance inland or that extend seaward beyond the outer margins of the sublittoral (neritic) zone. We encourage you to visit www.cerf-jcr.org for more information and invite you all to be a part of our CERF-JCR coastal research society.

CERF-JCR MEMBERSHIP

Society members are those individuals that support the aims of CERF and the JCR. More information is available at: www.cerf-jcr. org. CERF-JCR Memberships are available in different categories with certain privileges and can be viewed at: https://cerf.allenpress.com/cerf/MEMBERSHIP.aspx

Subscription information is available upon request by writing to: **cerf.jcr@gmail.com.** The CERF-JCR subscriptions office is located at: Allen Press, Inc., P.O. Box 1897, Lawrence, KS 66044, U.S.A.

Editor-in-Chief Christopher Makowski, Ph.D.

Dr. Christopher Makowski is the Senior Vice President and Co-Executive Director of the Coastal Education and Research Foundation (CERF), the official publisher of the international Journal of Coastal Research (JCR). He received B.Sc. (Marine Biology), M.Sc. (Marine Ecosystem Diversity), and Ph.D. (Coastal Geoscience and Remote Sensing of Biogeomorphological Resources) degrees from Florida Atlantic University of Boca Raton, Florida, USA, and has worked for over 25 years in the coastal research community, holding titles of Assistant Director (Coastal Planning & Engineering's Marine Science and Biological Research Department), Principal Marine Scientist (Collier County, Florida, USA), and Senior Advisor (International Coastal Symposium [ICS]). Dr. Makowski has published numerous peer reviewed papers, authored multiple chapters, and co-edited various volumes in Springer's Coastal Research Library (CRL) Series and Encyclopedia of Earth Sciences Series (EESS). In addition to these accomplishments, he is professionally recognized by the American Academy of Underwater Sciences (AAUS) and is certified as a Master Scuba Diver Trainer through the Professional Association of Diving Instructors (PADI), having logged over 2,000 underwater dives on six different continents. Other professional registrations, certifications, and accreditations include: Coastal Education and Research Foundation (CERF) Board of Directors (Trustees), BioOne Board of Directors, International Society for Reef Studies (ISRS) Member, Florida Association of Environmental Professionals (FAEP) Chapter Member, American Academy of Underwater Sciences (AAUS) Registered Diving Safety Officer, American Association for the Advancement of Science (AAAS) Member, National Marine Fisheries Service (NMFS) Certified Marine Mammal and Protected Species Observer, Professional Association of Diving Instructors (PADI) Open Water Scuba Diver Instructor, PADI Enriched Air Nitrox Specialty Instructor, Emergency First Responder (CPR/FirstAid/AED) Instructor, PADI Specialty Underwater Photographer Instructor, and Divers Alert Network (DAN) Sustaining Member.

For more information, please visit Dr. Makowski's home page at:

www.cerf-icr.org

International Coastal Symposium (ICS) Official Meeting of CERF-JCR

The International Coastal Symposium (ICS) was originally set up by Per Bruun (deceased) and Charles W. Finkl as the official meeting of the Coastal Education and Research Foundation (CERF) and the Journal of Coastal Research (JCR), with one of the first meetings being held in Hilton Head, South Carolina, in 1993. After the repeated success of these meetings, CERF-JCR moved the ICS to an international platform by holding these conferences in conjunction with local sponsors in the United States, Australia, Brazil, Iceland, New Zealand, Northern Ireland, Poland, Portugal, and South Korea. The ICS brings together delegates from all over the world to collaborate and discuss the most current coastal research studies and projects. During the ICS 2014, which was held in Durban, South Africa, a grand celebration took place to mark the 30th Anniversary of CERF and the JCR. For more information, please visit www.cerf-jcr.org.
