The Greater Bay Area and the Hong Kong-Zhuhai-Macau Bridge. The Greater Bay Area in China consists of the mega cities in Southern China's Pearl River Delta region, including Hong Kong, Macau, Guangzhou, Shenzhen, Zhuhai, Foshan, Dongguan, Zhongshan, Jiangmen, Huizhou, and Zhaoqing. In total, the population of the Greater Bay Area is more than 70 million, contributes 37% of the country's exports, and 12% of its GDP. The Greater Bay Area represents an ambitious plan to compete with Silicon Valley by pooling talents, finance, infrastructure, and technological economies of scale to build the first true global competitor. The Greater Bay Area has grown rapidly from a swampland to a leader in Chinese technological innovation and has become a premier technology and manufacturing hub, where it expects to be the largest coastal economy among global bay areas by 2020.
