BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

EDITOR'S NOTE

(with with credit to Dr. Larry Gall for helping develop this text)

The Journal of the Lepidopterists' Society and the News of The Lepidopterists' Society are now available online to all interested parties at <http://images.peabody.yale.edu/lepsoc/jls/> and <http://images.peabody.yale.edu/lepsoc/nls/> respectively. The society's new open access solution is hosted on behalf of the Society by the Peabody Museum of Natural History at Yale University. The contents for each issue of the Journal and News are posted as PDF files to these websites soon after the printed versions have been distributed to members. For the Journal, the posted PDFs represent individual Articles and Notes, whereas the posted PDFs for the News represent full issues. All of the PDFs contain embedded OCR layers which makes them both internally (within the PDF) and externally (via the web) searchable. The current websites are the result of ongoing work by David Lohman, Larry Gall, and their colleagues. Beginning in 2012, an embargo of Journal content (which had been 3 years) was removed, back issues of the News were scanned, and PDFs for both the News and Journal were reprocessed to embed OCR layers in all the files. In 2013, the News and Journal websites went live at their current addresses.
