BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

COVER PHOTOGRAPH

The results of both studies BEIBU and PECAI were obtained in the Beibu Gulf also known as Gulf of Tonkin (GoT) and the Pearl River Estuary (PRE). The map presents the regional setting of the studies. Marked are the Red River Delta (RRD), LP (Leizhou Peninsula), the Hainan Island (HI) and Qiongzhou Strait (QS). The bathymetry in 5 m increments is color labeled as described in the legend and based on ETOPO1, whereas the topography is based on SRTM90. Isobath in 25 m increments are also indicated (thin black lines). The chart was created by M. Endler (IOW).

Back Cover: Includes the logos of the four main institutions involved in these studies, along with the two central funding agencies:

Leibniz-Institute for Baltic Sea Research, Germany
 University of Szczecin, Poland
 Guangzhou Marine Geological Survey (PR China)
 South China Sea Institute of Oceanology (PR China)

Bundesministerium für Bildung und Forschung (Germany)
 China Geological Survey (PR China)
