Abstracts of Applications and Opinions, Comments in full and details of the names published in the *Official Lists and Indexes of Names and Works in Zoology* are posted on the Commission's website (<http://iczn.org>)

Cover image: *Nanophyes marmoratus* (Goeze, 1777), known as the purple loosestrife weevil, illustrated by Mark Russell (published with his kind permission). The genus *Nanophyes* and its type species *Nanophyes marmoratus* were placed on the Official Lists of Generic and Specific Names in Zoology by rulings in Opinion 1526 (BZN 46: 67–68). The purple loosestrife weevil is an important biocontrol agent against the European weed *Lythrum salicaria* L. in North America and an exceedingly diverse species in colour pattern.
