Star ratings:

Black – Highly significant in context of global biodiversity; Rare globally and not widespread in Ghana

Gold – Significant in context of global biodiversity; fairly rare globally and/or nationally

Blue – Mainly of national biodiversity interest; e.g. globally widespread, nationally rare; or globally rare but of low concern in Ghana due to commonness

Scarlet – Common and widespread commercial species; potentially seriously threatened by overexploitation

Red – Common and widespread commercial species; under significant pressure from exploitation

Pink – Common and widespread commercial species; not currently under significant pressure from exploitation

Green – Species common and widespread in tropical Africa; no conservation concern
