## Photos from the Atewa RAP Survey

All photos taken by Otas Eck except where noted)

Butterfly (*Kallimoides rumia*)

A new species of tick spider (*Ricinoides* sp. n.)

Tadpoles of the clawed frog (*Silurana tropicalis*)

A female of *Orthetrum julia* (the Julia Skimmer), one of Africa's most common dragonfly species

Green tree viper (*Atheris chlorechis*)

Atewa tree fern (*Cyathea manniana*)

Rhinoceros viper (*Bitis nasicornis*)

A new species of katydid (*Tetraconcha* sp. n.)

Szabolcs Sáfán

Mudpuddling male of the Atewa Dotted Border, *Mylothris atewa*, a narrowly endemic species that occurs only in the upland rainforest of the Atewa Range

A driver ant (*Dorylus* sp.) attacking a termite

A stream of driver ants (*Dorylus* sp.)

*Hyperolius bobirensis* is known only from two other Ghanaian sites. Characteristics are its large size and the granular back skin.

RAP scientist Natalie Weber with a bat (*Hipposideros gigas*)

Tree frogs in amplexus (*Chiromantis rufescens*)

Decayed leaf katydid (*Weissenbornia praestantissima*)

Leaf katydid (*Poreuomena lamottei*)

The Atewa RAP team

The aquatic *Conraua derooi* is Critically Endangered and may have its largest populations in the Atewa Range Forest Reserve
