The RAP survey of the Mountains of Southwest China and publication of this RAP report were made possible by generous financial support from The Walt Disney Company (TWDC). This RAP survey was part of Mission Himalayas, a scientific and outreach collaboration between Conservation International, The Walt Disney Company, and Discovery Networks US (DN) to raise awareness of the biodiversity and conservation of the Himalayan region and to obtain background information for Disney's Expedition Everest - Legend of the Forbidden Mountain.

First and foremost we thank Dr. Russ Mittermeier, Conservation International (CI) President for initiating this project with Disney and for participating in filming in China and site visits to the Himalayas. Very special thanks go to Joe Rohde from Walt Disney Imagineering (WDI) for his creative inspiration and conservation perspective that started this collaboration, for his entertaining company in the field, and for sharing his extensive knowledge of Tibetan culture.

Many people and institutions were involved in making this RAP survey and Mission Himalayas successful. Special thanks also go to Jennifer Gerstin from WDI for all her hard work to make this project happen and to Dr. Anne Savage from Disney's Animal Kingdom (DAK) for her contagious enthusiasm and participation in the RAP surveys. We also especially thank Suzy O'Hara, who was instrumental in Mission Himalayas and for coordinating all the media aspects. We thank Disney Parks & Resorts Chairman Jay Rasulo, and many others from Disney who supported this project, especially Lori Amon, Jerry Montgomery, Carole Munroe, Jamie Olofson, Diego Parras, Ken Potrock, Kim Sams (DWCF), Tony Shepherd, David Sibila, Dr. Beth Stevens, and Marilyn Waters.

We are grateful to Discovery Networks US for joining Mission Himalayas and for featuring the Mountains of Southwest China in their TV programming. We especially thank Clark Bunting for initiating and guiding Discovery's participation in this project. Posthumously, we thank Jamie Roberts for his key role on the Discovery/Animal Planet leadership team. Thanks to Dr. Lucy Spelman, Barney Revill and Jeff Corwin for covering the action in the field. We also thank Allan Butler, Yehuda Goldman, Annie Howell, Bill Margol, Michael Prettyman, and Lori Rothschild from Discovery, and Andrew Jackson from Tigress Productions for their support.

Many people from CI's Center for Environmental Leadership in Business (CELB) helped coordinate the Mission Himalayas collaboration, especially the media aspects. We especially thank Julian Texeira, Jason Anderson, and Adam Schoenberg for their support. We also thank Leslie Kasmir and Jennifer McCullough from CI's Rapid Assessment Program for their invaluable logistical support. CI-China staff provided invaluable logistical and field coordination. We especially thank Lu Zhi, Director of CI-China; Li Shengzhi, Director of CI-Chengdu; Shen Xiaoli, CI's Sacred Lands Project Coordinator; Wang Hao, CI-China scientist, and Li Jianhong for all their support. We also thank Philip Chou, CI-DC, China Program Coordinator for his translating assistance and company in the field. Our thanks also go to Miss Kim, Miss Zhu, and Mr. Leo for their assistance with translation services.

We especially thank Sun Zhiyu, Wang Xin, Zhao Jie, Fu Jianrong from the Sichuan Academy of Forestry for their cogent logistical support and high-efficiency organizing. During the survey, we encountered the largest rainstorm over the last 50 years and the road to our survey site was heavily damaged. It was their logistic support and effort that ensured the success of our survey and a pleasant cooperation among all team members.

Warm thanks go to Gu Haijun, and Gu Xiaodong of the Wildlife Conservation Division, Sichuan Provincial Forestry Department. Thanks also go to Dan Bei Jiang Can, the Living Buddha, Dingguoshan Monastery, Danba for his welcoming support for the RAP survey and his guardianship of the natural resources around his monastery. In particular we thank Dr. Luo Peng and Dr. Wang Yuezhaohao from the Chengdu Institute of Biology; Liu Wei, Director of the Ganzi Forestry Bureau; Wang Zongming from the Liangshan Forestry Bureau; Gong Tianjian from the Shen Guozhuang Reserve; Wang Dayong from Yele Reserve, and Liu Guanghua from Southwest Normal University. We thank Li Bajin, Mao Yalin, Wang Honggang, Jiang Wei, Li Xingwu, Li Ming, Li Yinchun, Zhang Hui from the Yajiang Forestry Bureau, and Luo Bu Jia Ta, Li Limin, Zhang Li, Dan Ba Ze Lang, and Luo Bin from the Danba Forestry Bureau for their logistical support and help in the field.

The RAP bird teams are grateful to other members of the RAP team, especially Rebecca Pradhan, James Sanderson and Wang Hao for providing some significant birds records. We also warmly thank villagers from Dingguoshan, Tongling and Decha for acting as guides during our surveys.

The RAP ant team thanks Peter Hoke (Conservation International), Li Xingwu (Forestry Bureau of Yajiang County), Gong Bu Zha Xi (Decha Village, Yajiang County), Chen Tao (Tongling Village, Kangding County), and villagers from Kuyong Village (Danba County) assisting field investigation and specimen collection.

Dr. Shi Fuming would like to thank the Chinese and international biodiversity experts of the Rapid Assessment Program (RAP) team for help in collecting specimens. Thanks also to Prof. Li Zizhong (Institute of Entomology, Guizhou University), Dr. Liang Aiping (Institute of Zoology, Chinese Academy of Sciences), Dr. Yang Ding, Prof. Wang Xinli and Dr. Liu Zhiqi (China Agricultural University), Dr. Wei Meicai (Central South Forestry University), Prof. Yang Lianfang, Dr. Su Changhai and Wang Beixin (Nanjing Agricultural University), Dr. Bu Wenjun and Dr. Liu Guoqing (Nankai University), Dr. Niu Yao (Henan Normal University), Dr. Ren Guodong (Hebei University), Dr. Yu Guoyue (Institute of Plant & Environ. Protection, Beijing Acad. of Agric. & Forestry Sciences), for identifying relative insect specimens.

The Large Mammal team thanks the Sichuan Academy of Forestry, other scientists, and field workers who supported us by collecting scat and hair from the field. Special thanks to Ar Zhu in Danba, Gao Xuefeng in Kangding, and Jiang Wei in Yajiang.

The small mammal team thanks Sun Zhiyu, Fu Jiangrong, Wangxin and Zhaojie from Sichuan Academy of Forestry.

We finally thank Li Sheng, Zhang Lu, Liu Yanlin and Wu Lan from Center for Nature and Society Peking University who helped with the translation of the report.
