

# ACKNOWLEDGMENTS

We are very lucky to have had a great deal of very generous help and support from many people without whom this book could not have been produced.

We would like to thank Mrs Natalie Barnett, Dr Michael Braby, the late Dr Ian Common, Mr Fabian Douglas, Dr George Gibbs, Mr John Green, the late Mr Bob Jessop, Dr Lauri Kaila, Dr Axel Kallies, Mr Ray McInnes, Mr Peter Marriott, Dr David Rentz, Dr Don Sands, Dr Steve Shattuck, Mr John Stockard, Mr Jan Taylor, Mr Murray Upton, Dr Andreas Zwick and CSIRO Entomology for permission to use photographs they have taken or have in their care. There are a few photographs from the CSIRO Entomology photo library that we could not attribute to a photographer and we apologise to anyone whose photograph has been used with incorrect acknowledgement.

Ms Jo Cardale, Dr Max Day, Dr Marianne Horak, Dr Niels Kristensen, Dr Tosio Kumata, Mr David Lane, Dr Alice Wells and Dr Max Moulds have provided very valuable advice on the identity of some of the insects illustrated or on other problems; their help is gratefully acknowledged. Over many years colleagues at CSIRO Entomology have given unstinting support, time, advice and encouragement and especially the late Dr Ian Common, Dr Marianne Horak, Ms Vanna Rangsi and Mr Murray Upton. Help with fieldwork to locate odd families was provided by Mr Glenn Cocking, Dr Peter McQuillan,

Dr David Rentz and Dr Andreas Zwick and friends in Sydney, Mr Bart Hacobian and Mr Len Willan, have been a constant source of inspiration and enthusiasm.

Parts of the manuscript were read by Mr Glenn Cocking, Mr Lyn Craven, Dr Doug Hilton, Dr Marianne Horak and Dr Andreas Zwick, and many helpful comments were received. Dr Joanne Daly, Chief of CSIRO Entomology, has indulged one of the authors with the opportunity to write the book while holding a Post Retirement Fellowship with CSIRO Entomology and permitted the use of illustrations that appeared in *Insects of Australia*, published by Melbourne University Press.

The CSIRO Entomology photo library has been fully available and permission to reproduce many photographs is gratefully acknowledged. A great many other colleagues too numerous to mention have helped in building, maintaining and supporting the Australian National Insect Collection at CSIRO Entomology and provided much personal help and friendship over many years.

We are grateful for the early stages of the Hercules moth, which were provided by Ms Silke Weyland and the assistance provided by Ms Anja Bakker and Ms Robyn Cruse of the Australian Butterfly Sanctuary, Kuranda. Ms Ann Crabb provided enthusiastic support for the project in CSIRO Publishing and this was later taken up by Mr Nick Alexander who has provided cheerful and continuing assistance.
