

FURTHER READING

- Peate N, MacDonald G and Talbot A (1997) *Grow What Where: Over 1000 Exotic and Australian Plants to Suit Every Garden Situation*. Lothian: Melbourne. [Author's note: later editions of this book have had all exotic plants expunged from their pages and now only contain Australian native plants. It is worth hunting down the excellent 1997 edition which is arguably much more useful to home gardeners.]
- Taylor J (1998) *Plants for Dry Gardens: Beating the Drought*. Frances Lincoln: London.
- Walsh K (2009) *Waterwise Gardening*. New Holland: Sydney.
