Subject Index, 2012

A

adrenocorticotrophin
stress and avian leukosis viremia in chickens, 578
African collared dove hybrids
trichomonosis in Caribbean flocks, 441
Alopecoen aegyptiacus
antibody response and viral shedding of LPAI, 341
Amazona vinacea
fatal toxoplasmosis, 774
Anas platyrhynchos
Chlamydia psittaci infections in Sweden, 737
infectivity and viral shedding of LPAI viruses, 981
inflammatory markers after bacterial lipopolysaccharide exposure, 704
inflammatory markers following fuel oil exposure, 704
pathogenesis of low pathogenic avian influenza, 976
aneurysm, right ventricular
in a pigeon, 778
Anser cygnoides domesticus
malignant Sertoli cell tumor, 781
anterior fatissimus dorsi
myodegeneration and carcass downgrading, 418
anti-avian bornavirus antibodies
detection in psittacines, 471
antibodies
detection in serum and yolk against LPAI, 601
to influenza in raptors, 411
antibody-antigen complex
vaccine against virulent Newcastle disease, 555
antibody measurement
effectiveness of infectious coryza vaccine, 65
antibody response
to LPAI in Egyptian geese, 341
antimicrobial sensitivities
of Campylobacter jejuni in Germany, 685
arajubas
hematologic reference values, 701
Aratinga solitarius
central transmission of avian bornavirus, 471
Arenaria interpres morinella
annual survival rate and LPAI, 567
Argentina
avian influenza from gulls in coastal regions and wetlands, 1017
helminth infections in Oliver’s gulls, 764
aspergillosis
β-D-glucans concentrations, 183
serologic test in commercial poultry flocks, 160
Aspergillus fumigatus
detecting infections in birds, 183
astrovirus
causative agent of poultry enteritis, 173
detection with multiplex RT-PCR test in turkeys, 592
Australia
wild aquatic bird morbidity and mortality, 249
Astrovirus
causative agent of poultry enteritis, 173
avian bornavirus
mixed infections in psittacines, 414
pathogenesis in psittacines, 153
proventricular dilatation disease in psittacines, 414
vertical transmission in sun conures, 471
avian influenza
and wild bird conservation in Sardinia, 1034
circulation in wild birds of Central Asia, 234
development of a risk assessment tool, 1058
in backyard poultry in Colorado, 263
North America, 2009–2011, 845
occurrence in gulls from Argentina, 1017
prevalence in Texas bobwhite quail, 858
sampling methods for detection in wild birds, 114
serologic survey in wild birds using ELISA, 949
surveillance in Latin America, 1025
surveillance in Ukraine, 1010
surveillance in waterfowl on Texas coast, 1006
surveillance in wild birds in Denmark and Greenland, 992
surveillance in wild birds in Great Britain, 986
surveillance in wild birds in Russia, 456
surveillance in wild birds in Slovenia, 999
testing raptors for exposure using b-ELISA, 411
tracing movements of live decoy ducks, 1021
avian influenza, H1N1
prevalence of infections in Minnesota turkeys, 488
avian influenza, H1N1 pdm09
detected in turkeys in United Kingdom, 1062
avian influenza, H3N2
prevalence of infections in Minnesota turkeys, 488
avian influenza, H3N8
pathogenicity in ducks with E. coli infections, 597
avian influenza, H5
risk of infection in poultry workers, 1068
avian influenza, H5N1
effect of cocirculation with H9N2 on spread of infections, 849
efficacy of rHVT-AI vaccine in broilers, 913
efficacy of rHVT-H5 vaccine against Indonesian strains, 923
encephalitis in wild birds, 144
immune responses in different ducks, 479
outbreak in Cambodia in wild birds and poultry, 861
progress in control and eradication, 829
response to rNDV-H5 vaccination in ducks, 940
space-time clusters in Denmark and Sweden, 10040
avian influenza, H5N2
infections in juvenile ostriches, 966
outbreak in South African ostriches, 865
avian influenza, H6N8
antibody response and viral shedding in Egyptian geese, 341
avian influenza, H7
replication in SPF chickens, 959
risk of infection in poultry workers, 1068
avian influenza, H7N1
antibody response and viral shedding in Egyptian geese, 341
avian influenza, H9N2
effect of cocirculation with H5N1 on spread of infections, 849
in emus in India, 257
avian influenza, H13
susceptibility of various North American species, 969
avian influenza, highly pathogenic
detection and differentiation of H5, H7, N1, and N2, 90
detection using FTA® sampling cards, 200
eye detection in layer flocks, 905
evereffect of H5N1 and H9N2 LPAI cocirculation on infections, 849
efficacy of rHVT-AI vaccine in broilers, 913
efficacy of rHVT-H5 vaccine against Indonesian strains, 923
encephalitis in wild birds, 144
immune responses in different breeds of ducks, 479
impact of vaccines on control world-wide, 818
infections in juvenile ostriches, 966
internal contamination of egg, 897
multiplex microsphere assay, 90
outbreak control in table-egg layer flocks, 905
outbreak in Cambodia in wild birds and poultry, 861
outbreak in South African ostriches, 865
progress in control and eradication, 829
response to rNDV-H5 vaccination in ducks, 940
risk communication and response efforts, 1049
rNDV-H5 vaccine potency, 928

pathogenicity of H3N8 AI and E. coli, 597

E
education
poultry improvement in Tanzania, 1054
egg production
effect of strains on early detection of HPAI, 905
internal contamination with HPAI, 897
prevalence of Salmonella and rodent densities, 29
Egypt
efficacy of rHVT-AI vaccine against H5N1 avian influenza strains, 913
Egyptian goose
antibody response and viral shedding of LPAI, 341
Eimeria acervulina
immune response to adjuvant-profilin complex in broilers, 402
immunization with profilin and QCDC, 97
novel vaccine adjuvant complex, 97
Eimeria papionina
in peafowl in Germany, 238
Subject Index

Eimeria spp.
- protection using gel-bead delivery of oocysts, 306
- electroencephalogram determination of unconsciousness in depopulation, 884

Emus
- H9N2 avian influenza infections in India, 257
- paramyxovirus type 1 infections in India, 257
- encephalitis in wild birds with HPAI, 144

Enterococcus ceruum
- outbreak of spondylitis in broilers, 768

Enterococcus faecalis
- associated with first-week mortality in chickens, 51
- environment persistence and viability of Histomonas spp. outside of host, 224
- enzyme-linked immunosorbent assay (ELISA) detection of ILTV glycoprotein G antibodies, 509
- immunity induced by infectious coryza vaccine, 65
- serologic survey for avian influenza in wild birds, 949
- epidemiology of Colorado backyard poultry flocks, 263
- eradication of H5N1 highly pathogenic avian influenza, 829

Escherichia coli
- antimicrobial/host defense peptides protect broilers, 659
- associated with first-week mortality in chickens, 51
- coinfections with H3N8 influenza in ducks, 597
- Iis-based vaccine, 192

Escherichia coli, avian pathogenic extraintestinal in peacock with colisepticemia, 436
- spleen and peripheral blood leukocyte response, 732

Ethiopia
- very virulent infectious bursal disease in chickens, 605

Eurasian collared doves
- trichomonosis in Caribbean flocks, 441

Euthanasia
- electroencephalogram determination of unconsciousness, 884
- mass emergency water-based foam method, 891

F
- F protein expression in recombinant HVT NDV vaccine, 282
- Fabri, Julius, 1 feather follicle epithelium
- Marek's disease protein expression, 725
- feed, contaminated
- source of Salmonella Senftenberg in layer flocks, 516
- filamentous hemagglutinin from Pasteurella multocida cross-protects against fowl cholera, 589
- fimbriae antigens, Salmonella
- immune response after oral immunization, 347
- flagellin antigen as a vaccine against Salmonella Enteritidis, 354
- FlC protein, recombinant
- efficacy as potential vaccine against Salmonella Enteritidis, 354

Formicarius analis
- in wild forest birds of Venezuela, 583

Fowl adenovirus
- and inclusion body hepatitis in chickens, 73
- detection in formalin-fixed paraffin-embedded tissue sections, 741
- molecular characterization, 73

Fowl cholera
- Pasteurella multocida FHAB2 peptides vaccine, 589
- strains of Pasteurella multocida isolated in Polish outbreak, 529
- FTA® cards
- detection of avian influenza virus, 200
- fuel oil
- inflammatory markers after exposure in mallards, 704

Fumonisins
- effect on sphingolipid metabolism in birds, 120
- fumonisins B1
- and moniliformin interaction in quail hearts, 545
- fungal infections Fungitell assay for detection in multiple species, 183
- seasonal variations in Korean pigeons, 58
- serologic test for aspergillosis in poultry flocks, 160
- Fungitell® BG assay for detecting aspergillosis, 183

Fusarium contamination of feed and cardiac lesions, 545

G
- Gallibacterium sp.
- quantitative PCR assay for detecting gtxA gene, 315
- gamma-aminobutyric acid (GABA)
- partially protects against cellulitis and septicemia, 659
- gangrenous dermatitis
- differential gene expression profiles, 670
- role of 2-toxin and NetB toxin antibodies in broiler protection, 230
- gel-bead delivery of oocysts protects chickens against coccidiosis, 306
- gene expression in gangrenous dermatitis in broilers, 670
- genetic diversity and evolution of infectious bronchitis virus, 449
- infectious bronchitis in China, 15
- of infectious bronchitis viruses in vaccinated chickens, 501
- thermophilic Campylobacter spp. in Italian turkeys, 693
- genetic recombination in infectious bursal disease viruses, 574
- genetic typing infectious bronchitis virus, 634
- genetic variation and evolution of infectious bronchitis virus, 449
- homologous recombination of infectious bursal disease viruses, 574
- genome segment B
- diversity of infectious bursal disease viruses in US, 165
- genomic sequence of RAP44, 321
- genotyping use of vhaA gene of Mycoplasma synoviae, 711

Geotrygon linearis
- in wild forest birds of Venezuela, 583

Germany
- coccidiosis in peafowl, 238
- detection and typing of Ornithobacterium rhinotracheale, 654
- sensitivities of Campylobacter jejuni isolates in turkeys, 685
- glycoprotein G
- ELISA for detecting infectious laryngotracheitis, 509
- golden conures hematologic reference values, 701
- goose malignant Sertoli cell tumor, 781
- Great Britain
- H1N1 avian influenza in turkeys, 1062
- surveillance of wild birds for avian influenza, 986

Greenland
- surveillance of wild birds for avian influenza, 992
- gtxA gene
- quantitative PCR assay for detecting Gallibacterium, 315

Guaruba guarouba
- hematologic reference values, 701
- guinea fowl outbreak of toxoplasmosis in backyard flock, 750
- gulls avian influenza in coastal areas and wetlands of Argentina, 1017
- Newcastle disease viruses isolated in U.S., 128
H

*Haemoproteus* spp.
genetic diversity in forest birds in Venezuela, 583
heart, congenital malformation
in Cluj blue tumbler pigeon, 778
helminth
infections in Olrog's gulls in Argentina, 764
hemoplasmodian parasites
in forest birds in Venezuela, 583
histology
detection and serotyping of fowl adenovirus in tissues, 741
*Histomonas meleagridis*
outbreak in farm-reared bobwhite quail, 754
persistence in poultry houses in the environment, 224
horses
source of *Streptococcus equi* subsp. *zoopneumonia* outbreak, 561

I

immune response
evaluation of adjuvant-profilin complex against coccidiosis, 402
to liposome-associated rSEF21 in chickens, 347
immunity
use of vaccine/adjuvant complexes against coccidiosis, 97
immunoassay
detection of Salmonella in the environment, 621
immunosuppressive syndrome
in black-faced ibises from Chile, 611
inclusion body hepatitis
associated with fowl adenovirus, 73
detection in formalin-fixed paraffin-embedded tissue sections, 741
*in ovo* vaccine
recombinant Newcastle disease virus Clone 30 variants, 208
India
H9N2 AI and paramyxovirus infections in emus, 257
Indonesia
against H5N1 HPAI strains, 923
participatory disease surveillance for HPAI, 377
infection model
fowl adenovirus IBHV(SK), 73
infectious bronchitis
review of serotypes, 634
surveillance and identification worldwide, 634
viral subpopulations in ArkDPI vaccines, 642
infectious bronchitis virus
*genetic diversity and selection*, 449
*genetic diversity in China*, 15
subpopulations in chickens after vaccination, 501
infectious bursal disease
effect on avian leukosis infections in chickens, 2
*genome segment B diversity*, 165
*isolation of viruses* in Delmarva peninsula, 82
infectious bursal disease virus
*homologous recombination evidence*, 574
infectious bursal disease virus, *very virulent*
*molecular evidence* in Ethiopian chickens, 605
infectious coryza
*RTX-toxin-like gene from Avibacterium paragallinarum*, 537
serovars, sensitivities and virulence in Thai chickens, 359
infectious coryza vaccine
*new ELISA* to measure immunity, 65
*infectious laryngotracheitis*
factors in outbreak in broiler farms, 521
*infectious laryngotracheitis virus*
ELISA test to detect antibodies to glycoprotein G, 509
quantification of viral genomes using real-time PCR method, 406
inflammatory markers
*in ducks following fuel oil exposure or bacterial lipopolysaccharides*, 704

Subject Index

infectious A
*surveillance wild birds* in Russia, 456
*testing raptors for exposure*, 411
intracytoplasmic acidophilic droplets
*in chicken spinal cord neurons*, 110
Isc
*use in a vaccine for* APEC, 192
Italy
avian metapneumovirus vaccination weaknesses in layers, 720
poultry enteritis, 173
serosurvey of poultry workers for H5 and H7 avian influenza, 1068
thermophilic *Campylobacter* spp. *in turkeys*, 693

J

Japan
Salmonella Senftenberg contamination in commercial farms, 516
Japanese quail
efficacy of H5N1 avian influenza DNA vaccine, 937
toxic effect of fumonisin B1 and moniliformin on heart, 545

K

Korea
leptogenic Newcastle disease in live bird markets, 218
seasonal variation in fungal infections in pigeons, 58

L

*Larus atlanticus*
helminth infections in Argentina, 764
*Larus* spp.
avian influenza in coastal areas and wetlands of Argentina, 1017
LaSota vaccine
*for ZJ1* strain of virulent Newcastle disease, 464
Latin America
*surveillance for avian influenza and spread*, 1025
layers
effect of strains on early detection of HPAI, 905
efficacy of *Mycoplasma gallisepticum* vaccines, 272
feed as source of Salmonella Senftenberg contamination, 516
HPAI-contaminated eggs and holding time, 897
infected but undetected infections of HPAI in eggs, 897
occurrence of transmissible viral proventriculitis, 757
routes for avian influenza virus inoculation, 276
weaknesses in vaccination strategies for avian metapneumovirus, 720
leukocytes
response to avian pathogenic *E. coli*, 732
live bird markets
leptogenic Newcastle disease in live bird markets, 218
surveillance for LPAI, 880
live decoy birds
tracking movements, 1021
live vaccine
*characterization of LaSota strain*, 464
derived from F strain *Mycoplasma gallisepticum*, 396
Louisiana, USA
outbreak of simulitoxotoxicosis in birds, 616
lymphoid atrophy
*adverse effect of MEQ-deleted Marek's disease vaccine*, 494

M

malignancy
Sertoli cell tumor in a goose, 781
mallard
*Chlamydia psittaci* infections in Sweden, 737
infectivity and viral shedding of LPAI viruses, 981
inflammatory markers after bacterial lipopolysaccharide exposure, 704
inflammatory markers following fuel oil exposure, 704
pathogenesis of low pathogenic avian influenza, 976
mandibular osteomyelitis
*in turkeys caused by Staphylococcus aureus*, 427
Newcastle disease virus
- real-time reverse transcription-PCR test for matrix gene, 387
- vaccine improvements with recombinant HTV, 282

Newcastle disease virus-H5 vaccine
- immune responses in ducks, 940

Newcastle disease virus, lentogenic
- epidemiology in live bird markets in Korea, 218

Newcastle disease virus, recombinant
- pathogenicity and immunogenicity of Clone 30 variants, 208

North America
- review of avian influenza outbreaks, 845
- susceptibility of various species to H13 LPAI, 969

O

Olrog’s gull
- helminth infections in Argentina, 764

ompR gene
- biofilm formation by Salmonella Pullorum disease, 134

oncogenicity
- of myeloblastosis-associated virus type 1, 7

Ornatibacterium rhinotracheale
- and Streptococcus zooepidemicus co-infections, 680
- detection and typing in Germany, 654
- vaccination improves broiler performance, 365

opharyngeal swabs
- detection of avian influenza virus, 227

osteosarcoma
- in chickens, 422
- ostriches
- HSN2 HPAI infections in juveniles, 966
- outbreak of HSN2 avian influenza in South Africa, 865

P

paramyxovirus type 1
- in emus in India, 257
- in racing pigeons in Uruguay, 243

parasites
- persistence and viability of Histomonas spp. outside of host, 224
- parasites, hemosporidian
  - in Venezuelan wild birds, 583
  - participatory disease surveillance method for HPAI in Indonesia, 377

paroviruses
- occurrence and types in US commercial turkey flocks, 744

Pasteurella multocida
- cross-protection from FHAB2 peptides vaccine, 589
- strains isolated in a Polish outbreak, 529

Pavo cristatus
- with extraintestinal E. coli, 436

peafowl
- coccidiosis in Germany, 238
- with extraintestinal E. coli, 436

peripheral nerve sheath tumors
- avian leukosis virus isolated in chickens, 35

phenotypic variability
- of infectious bronchitis viruses in vaccinated chickens, 501

pigeons
- circovirus infections in Slovenia, 432
- congenital right ventricular cardiac aneurysm, 778
- occurrence of paramyxovirus type 1, 243
- seasonal variation in fungal infections in Korea, 58

pigeon droppings
- fungal isolates in Korea, 58

pigeon paramyxovirus type 1
- in racing pigeons in Uruguay, 243

Plasmodium spp.
- in wild forest birds of Venezuela, 583

Poland
- strains of Pasteurella multocida isolated in fowl cholera outbreak, 529

Marek’s disease
- Meq and pathogenesis, 328
- protein expression in feather follicle epithelium, 725
- protocol for double vaccination, 295
- role of Meq mutations in oncogenicity, 328

Marek’s disease vaccine, MEQ-deleted
- adverse effect to lymphoid organs and weight gain, 494

Marek’s disease virus, recombinant
- selection based on oncogenicity, 328

matrix gene
- real-time reverse transcription-PCR detects paramyxovirus strains, 387
- melting curve analysis
- subtyping avian reoviruses, 369

Meq
- expression through in vivo selection, 328

microspheres, fluorescent
- delivery using nebulization, 381

Minnesota, USA
- prevalence of H1N1 and H3N2 AI infections in turkeys, 488

mitochondrial inclusion bodies
- in chicken spinal cord neurons, 110

models
- comparison for clusters of HPAI, 1040

moniliformin
- and fumonisin B₁ interaction in quail hearts, 545

morbillity
- of wild aquatic birds in Queensland, Australia, 249

mortality
- causes in first week for layers, 51
- of wild aquatic birds in Queensland, Australia, 249

multiplex microsphere assay
- for differentiation of avian influenza viruses, 90

Mycoplasma gallisepticum
- comparison of efficacy of vaccines in layers, 272
- comparison of live attenuated F strain-derived vaccines, 396
- effect of swab material on detection with real-time PCR, 310

Mycoplasma gallisepticum K-strain
- evaluation as a live vaccine, 44

Mycoplasma synoviae
- effect of swab material on detection with real-time PCR, 310
- genotyping using tylA gene, 711

mycotoxins
- effect of fumonisins in ducks and turkeys, 120

myeloblastosis-associated virus type 1
- oncogenicity and transmissibility in layers, 7

myocarditis
- associated with reovirus infection in broiler breeders, 786

myodegeneration
- of anterior latissimus dorsi in broilers, 418

nebulization
- and delivery of fluorescent microspheres, 381

necrotic enteritis
- role of α-toxin and NetB toxin antibodies in broiler protection, 230

nematodes
- infections in Olrog’s gulls in Argentina, 764

neoplasia
- effect of simultaneous IBDV and ALV-J infections, 2

Sertoli cell tumor in a goose, 781

neurofibrosarcoma
- associated with reovirus infection in broiler breeders, 786

myeloblastosis-associated virus type 1
- oncogenicity and transmissibility in layers, 7

myocarditis
- associated with reovirus infection in broiler breeders, 786

myodegeneration
- of anterior latissimus dorsi in broilers, 418

N

nebulization
- and delivery of fluorescent microspheres, 381

necrotic enteritis
- role of α-toxin and NetB toxin antibodies in broiler protection, 230

nematodes
- infections in Olrog’s gulls in Argentina, 764

neoplasia
- effect of simultaneous IBDV and ALV-J infections, 2

Sertoli cell tumor in a goose, 781

neurofibrosarcoma
- associated with reovirus infection in broiler breeders, 786
polymerase chain reaction
  detection of fowl adenovirus DNA in tissues section, 741
  serotyping of fowl adenoviruses from tissues, 741
polymerase chain reaction, quantitative
detection of Gallibacterium gtxA gene, 315
polymerase chain reaction, real-time
  swabs and detection of Mycoplasma spp., 310
Porrocaecum heteropterum
  immunosuppressive syndrome in black-faced ibis, 611
poultry enteritis
  caused by astroviruses in Italy, 173
poultry health
  improvement program in Tanzania with children, 1054
poultry workers
  serosurvey for H5 and H7 avian influenza infections, 1068
  profilin
    plus adjuvant improves immune response to Eimeria acervulina, 402
    use in vaccines against coccidiosis, 97
proventricular dilatation disease
  in psittacines with mixed bornavirus infections, 414
  pathogenesis in psittacines, 153
proventricular necrosis virus
  found in broiler breeders and laying hens, 757
proventriculus, transmissible viral
  in broiler breeders and laying hens, 757
psittacines
  bornavirus and proventricular dilatation disease, 414
  disease course of avian bornaviruses, 153
  identifying mixed bornavirus infections, 414
  vertical transmission of avian bornaviruses, 471
pulmonary disease
  genes needed for biofilm formation, 134

Q
QCDC (Quil A, cholesterol, dimethyl dioctadecyl ammonium bromide, Carbopol)
  and profilin against coccidiosis, 97, 402
QCDCR (QCDC/Bay R1005)
  and profilin against coccidiosis, 97, 402
quail, bobwhite
  outbreak of blackhead disease, 754
  prevalence of avian influenza viruses in Texas, 858
quail, Japanese
  efficacy of H5N1 avian influenza DNA vaccine, 937
  toxic effect of fumonisin B1 and moniliformin on heart, 545

R
RAP44 bacteriophage
  genomic sequence, 321
RapidChek SE immunoassay
  detection of Salmonella bacterin in environment, 621
  raptors
testing for exposure to avian influenza using b-ELISA, 411
Rattus rattus
Salmonella spp.
  shedding patterns and transmission, 288
  real-time polymerase chain reaction
test for quantitation of infectious laryngotracheitis virus, 406
real-time reverse transcription-polymerase chain reaction
  and pooled swabbings for detecting avian influenza viruses, 227
  subtyping avian reoviruses, 369
to detect matrix gene of avian paramyxovirus, 387
reference values, hematologic
to golden conures, 701
reovirus
  associated with myocarditis in broiler breeders, 786
to detect with multiplex RT-PCR test in turkeys, 592
respiratory tract
effect of exposure time on delivery and distribution of microspheres, 381
  nebulization delivery of aerosolized fluorescent microspheres, 381
  revaccination
  against Marek's diseases, 295

Subject Index
reverse transcription-polymerase chain reaction
detection of astrovirus, rotavirus and reovirus, 592
rHVT-H5 vaccine
efficacy against Indonesian H5N1 HPAI strains, 923
Riemerella anatipestifer
genomic sequence of bacteriophage RAP44, 321
risk	of avian influenza infections to poultry workers, 1068
  risk assessment
    and preparedness for HPAI, 1049
    development of tool for avian influenza, 1058
  risk factor analysis
    of infectious laryngotracheitis outbreak, 521
rNDV-H5 vaccine, LaSota strain
  potency in SPF chickens against HPAI, 928
rodents
  populations on layer farms and Salmonella prevalence, 29
  roof rats
    transmission and shedding of Salmonella spp., 288
  rotavirus
detection with multiplex RT-PCR test in turkeys, 592
route of inoculation
effect on infectivity and viral shedding of LPAI, 981
RTX toxin-like gene
detection in environment using immunoassay, 621
salmonellosis
  aspergillosis in chickens and turkeys, 160
  broilers protected by antimicrobial/host defense peptides, 659
  septicemia
    in fungal infections in Korean pigeons, 58
Secure Egg Supply Plan
  for highly pathogenic avian influenza, 1049
SEF21, recombinant
  immune response in chickens, 347
  sensitivity in commercial layer farms in eastern Japan, 516
Salmonella spp.
  shedding patterns in rats from contaminated layer farms, 288
  transmission by wild roof rats in commercial layer farms, 288
  sample storage
effect on detection of avian influenza viral RNA, 955
testing for exposure to avian influenza using b-ELISA, 411
  sampling methods
effect of type of swab used, 114
Sardinia
  avian influenza and endangered wild birds, 1034
  Saskatchewan
    inclusion body hepatitis with fowl adenovirus, 73
    seasonal variation
      in fungal infections in Korean pigeons, 58
Secure Egg Supply Plan
  for highly pathogenic avian influenza, 1049
  recombinant
    immune response in chickens, 347
  sensitivity, antimicrobial
    of Campylobacter jejuni in Germany, 685
Septifer
  broilers protected by antimicrobial/host defense peptides, 659
  serodiagnosis
    aspergillosis in chickens and turkeys, 160
  serotyping
    of fowl adenovirus in tissues samples using PCR, 741
  of Ornithobacterium rhinotracheale found in Germany, 654
Subject Index

T

Tanzania
  poultry health improvement program using children, 1054
Texas, USA
  prevalence of avian influenza in bobwhite quail, 858
  surveillance for avian influenza in hunter-harvested waterfowl, 1006
Thailand
  infectious coryza serovars, sensitivity and virulence, 359

Theristus melanopis melanopis
  immunosuppressive syndrome in Chile, 611
  tissue sections
detection of fowl adenovirus in samples, 741
toxins
effect of fumonisins in ducks and turkeys, 120

Toxoplasma gondii
  in backyard guinea fowl flock, 750
  in vinaceous Amazon parrot, 774
toxoplasmosis
  in vinaceous Amazon parrot, 774
  outbreak in backyard guinea fowl flock, 750
transcriptome
  patterns in response to avian pathogenic E. coli, 732
trematodes
  infections in Olrog’s gulls in Argentina, 764
trichomonosins
  in free-range collared doves in West Indies, 441

Trichomonas gallinae
  identifying genotypes in Streptopelia spp., 441
turkeys
  antimicrobial sensitivities of Campylobacter jejuni, 685
detection of astrovirus, rotavirus, and reovirus, 592
effect of fumonisins on sphingolipid metabolism, 120
H1N1 avian influenza in United Kingdom, 1062
  mandibular osteomyelitis, 427
  outbreak of type C botulism in commercial flock, 760
  prevalence and types of paroviruses in commercial US flocks, 744
  prevalence of H1N1 and H3N2 AI infections in Minnesota, 488
  serologic testing for aspergillosis, 160
  Streptococcus aureus infections, 427
  thermophilic Campylobacter spp. in Italy, 693
  unilateral periorbital cellulitis, 427

U

Ukraine
  avian influenza surveillance of wild birds, 1010
United States
  infectious bursal disease genome segment B diversity, 165
  prevalence and types of paroviruses in turkey flocks, 744
  virulent Newcastle disease in gulls and cormorants, 128
United Kingdom
  H1N1 avian influenza in turkeys, 1062
  surveillance of wild birds for avian influenza, 986
Uruguay
  pigeon paramyxovirus type 1 in racing pigeons, 243

V

vaccination
  against coccidiosis using gel-bead delivery, 306
  DIVA strategies for avian influenza, 836
  for Ornithobacterium improves performance in broiler flocks, 365
  Marek’s disease double vaccination protocol, 295
  recombinant HVT Newcastle disease, 282
  responses of different ducks to H5N1 HPAI, 479
  recombinant Newcastle disease virus Clone 30 variants, 208
  against coccidiosis using gel-bead delivery, 306
  for Ornithobacterium improves performance in broiler flocks, 365
  Marek’s disease double vaccination protocol, 295
  recombinant HVT Newcastle disease, 282
  responses of different ducks to H5N1 HPAI, 479
  with liposome-associated sEF21, 347

vaccination, in ovo
  antibody–antigen complex against virulent Newcastle disease, 555
vaccination strategy
  problems with avian metapneumovirus programs, 720
vaccine
  based on Iss for pathogenic E. coli in poultry, 192
derived from live attenuated F strain of Mycoplasma gallisepticum, 396
effects of MEQ-deleted Marek’s disease vaccine, 494
effects of subpopulations of infectious bronchitis, 642
  for Mycoplasma gallisepticum in layers, 272
  impact on control of avian influenza, 818
  recombinant Newcastle disease virus Clone 30 variants, 208
  to fowl cholera from recombinant Pasteurella multocida, 589
vaccine/adjuvant complexes
effectiveness against coccidiosis, 97
vaccine, live
evaluation of Mycoplasma gallisepticum K-strain, 44
vaccine, rHVT-AI
efficacy against clade 2.2.1 H5N1 avian influenza, 913
vaccine, rHVT-H5
efficacy against Indonesian H5N1 HPAI strains, 923
vaccine, rNDV-H5
immune responses in ducks, 940
vaccine, rNDV-H5 LaSota strain
potency in SPF chickens against HPAI, 19
Venezuela
genetic diversity in hemorospidian parasites, 583
Vietnam
immune response to HPAI in different duck breeds, 479
viral shedding
effect of different inoculation routes on LPAI viruses, 981
of LPAI in Egyptian geese, 341
reduced with rHVT Newcastle disease vaccine, 282
viremia
effects on SPF chickens, 959
virulence factors in pullorum disease, 134
virulence factors
genesis involved in biofilm in pullorum disease, 134
vinaceous Amazon parrot
toxoplasmosis case, 774
vβδA gene
genotyping of Mycoplasma synoviae, 711

vβδA gene
genotyping of Mycoplasma synoviae, 711

Y

yolk antibodies
detection of LPAI in chickens, 601

waterfowl
surveillance for avian influenza on Texas coast, 1006
weight gain
adverse effect of MEQ-deleted Marek’s disease vaccine, 494
West Indies
trichomonosis in free-range collared doves, 441
wild birds
avian influenza in Central Asia, 234
detection of avian influenza virus with FTA® cards, 200
encephalitis caused by HPAI, 144
wild bird conservation
and avian influenza in Sardinia, 1034

Y

yolk antibodies
detection of LPAI in chickens, 601
