Subject Index, 2017

- adaptive mutation
- avian paramyxovirus type 1, 33

Africa
- avian influenza and Newcastle disease in village poultry, 165

African grey parrot
- Pasteurellaceae in, 102

air movement
- in disease spread, 198

ArkDPI vaccine
- against infectious bronchitis virus, 123, 221

AL101002 strain
- in ducklings, 115

Amazona aestiva
- Pasteurellaceae in, 102

Amazona ochrocephala
- Pasteurellaceae in, 102

American black duck,
- H5N1 in, 83
- LPAIVs in, 128

American goldfinch
- Salmonella in, 347

American green-winged teal
- HSN1 in, 83

aminocoumarins
- resistance to, 391

aminocyclitols
- resistance to, 391

aminoglycosides
- resistance to, 391

susceptibility assay, 457

amoxicillin
- resistance to, 186

Anas acuta
- HSN1 in, 83
- LPAIVs in, 128

Anas carolinensis
- avian influenza in, 128

Anas clyspeata
- avian influenza in, 128

Anas crecca
- HSN1 avian influenza virus in, 83

Anas discors
- avian influenza in, 128

Anas platyrhynchos
- HSN1 avian influenza in, 83
- avian influenza low pathogenic viruses in, 128
- Pasteurella multocida in, 457

Anas rubripes
- HSN1 in, 83
- avian influenza low pathogenic viruses in, 128

Aix sponsa
- avian influenza in, 128

animal models
- avian 3,
- congeneric and inbred chicken lines in, 358
- Eimeria/CP dual infection, 178

animal welfare parameters
- aspects of poultry housing, 366
- protocol for prevention of animal suffering, 316

antibiotics
- alternatives to, 503
- global restriction of, 3
- in food animals, 3, 186
- resistance to, 3, 186, 503
- susceptibility to, 457

anticoccidial drugs
- efficacy against field isolates, 237

in broilers, 214, 237
- sensitivity tests, 237

antimicrobial agents
- resistance to, 186, 391, 457

apigenin (C15H10O5)
- to control tibial dyschondroplasia, 372

apoptosis
- in fowl cholera, 491

Ara ararauna
- Pasteurellaceae in, 102

Arenaria interpres
- H5N1 in, 83

Arkansas Delmarva Poultry Industry (ArkDPI) IBV vaccine
- adapted to chicken embryo kidney (CEK) cells, 221
- delivered by hatchery spray cabinet, 123

arsenic-based drugs
- preventive of blackhead disease and available, 281

Ascaridida galli and bacteria
- interactions in chickens, 428

Ascaridida spp and microbes
- interactions in mammals, 428

Ascarids
- control of in turkeys and broiler breeders for control of blackhead disease, 281

Aspergillosis
- in poultry, 77

Aspergillus fumigatus
- in poultry, 77

Atlantic Flyway
- avian influenza in waterfowl migrating along the, 83, 128

attention
- lack of, sign of imminent death in chicks, 316

avian coronavirus
- research network, 145

avian growth plate
- role in tibial dyschondroplasia, 372

avian models
- chickens, 3, 335, 358
- co-infection, 335
- ducks, 3
- partridges, 3
- quail, 3
- resistance—susceptibility to IBV, 358
- turkeys, 3

avian influenza
- coinfecting pathogens, 3
- detected in migratory waterfowl, 83, 128
- detected in wild birds, 83, 128, 198
- early detection of, 83, 128
- experimental infections in avian models, 3
- investigation of outbreak in US upper midwest turkey farms, 198
- outbreak in Indiana, 414
- outbreak in Japanese quail, 70
- prevalence in juveniles, 128
- prevalence in village poultry of Mali, 165
- risk factors for, 165, 198
- spread of, 64, 198
- virus strains of, 3
- with Newcastle disease, 165

avian influenza virus
- case of in Italy, 261
- detected in sediment samples, Delmarva Peninsula, 520
- diversity of subtypes in waterfowl, 83, 128
- highly pathogenic, 3, 83, 165, 198, 261, 271, 414
- incidence in village poultry of Mali, 165
- low pathogenic, 3, 70, 128
- outbreak in Indiana, 414
- outbreak in Japanese quail, 70
- outbreak in Lebanon, 271
subject index

interactions with parasites in chickens, 428
levels in feed and performance during Clostridium challenge, 453
meningitis in chicks caused by, 135
Pasteurellaceae, 102
Vibrio cholerae, 102
bacterial artificial chromosome (BAC) standardized clones of, 107
bacterial infections
co-infection with viruses, 3
bacterial-induced macrophage cell death by Strepovirus gallidattigen, 117
bacterial iron-acquisition genes in Clostridium perfringens, 178
Bacteriodaceae
interactions with parasites in chickens, 428
bedding materials persistence of avian influenza virus in, 64
Belgium
goose hemorrhagic polyomavirus, 536
beta-lactams resistance to, 391
Bifidobacterium spp interactions with parasites in chickens, 428
biochemistry reference intervals for ring-necked pheasants, 211
biosecurity concerns, 16, 40, 281
measures and protocols, 46, 64, 198, 261, 531
training system-wide, 198
bird feeder role in transmission of disease, 311, 347
Bisgaard taxa, unnamed taxa 44 in psittacine birds, 102
blackhead disease collection and isolation in the field, 242
collection and isolation in the field, 242
collection and isolation in the field, 242
control and treatment measures for, 281
earthworms and, 281
in broilers, 281
in chickens, 281
in turkeys, 281
increasing since ban of nitarsone, 281
natural food/water additives to control, 281
prevention in turkeys and chickens, 281
vaccination against, 281
Blastocystis spp and intestinal microbiota in chickens, 428
bleach powder in footbaths
effect on persistence of avian influenza in, 64
blue macaw
Pasteurellaceae in, 102
blue-fronted amazon Pasteurellaceae in, 102
blue-winged teal avian influenza in, 128
boot disinfection effect on persistence of avian influenza, 64
Branta canadensis H5N1 in, 83
Brazil systemic histomoniasis in a peafowl from, 325
broilers
and ostriches in Iran, 387
Avian metapneumovirus (aMPV) in Romanian, 250
bedding material and avian influenza in, 64
Campyloctobacter coli meat contamination in Thailand, 186
Campyloctobacter jejuni meat contamination in Thailand, 186
Clostridium perfringens in, 178, 453
control of tibial dyschondroplasia in, 372
copper sulfate to treat H. meleagridis in, 281
E. coli infections in embryos, 472
Eimeria spp oocysts in litter and immunization strategy, 214

Avian metapneumovirus (aMPV) circulating in vaccinated Romanian broiler flock, 250
first detection of Subtype B in Greece, 409
vaccine escaping subtype B strains in Europe, 250
Avibacterium paragallinarum
and Gallibacterium anatis, 55, 335
detected using in situ hybridization (ISH) technique, 335
with coinfections, 3, 55, 335
avian paramyxovirus (APMV-1)
clinical signs in ducks, 33
genotype IX, 16, 33
isolated in Peru, 16
mortality in Cherry Valley duck, 33
mortality in Muscovy duck, 33
mortality in Sheldrake, 33
novel subgenotypes, 16
pathogenicity testing, 16
phylogenetic analysis of, 16, 25
repeat challenge of vaccinated birds, 245
serotypes 2, 6, and 10, 296
turkey herpes virus vectored vaccine for, 378
Avipoxvirus detected from tongue of canary, 531
avian influenza virus in, 64
Belgium
Goose hemorrhagic polyomavirus, 536
beta-lactams resistance to, 391
Bifidobacterium spp interactions with parasites in chickens, 428
biochemistry reference intervals for ring-necked pheasants, 211
biosecurity concerns, 16, 40, 281
measures and protocols, 46, 64, 198, 261, 531
vaccination against, 281
bird feeder role in transmission of disease, 311, 347
Bisgaard taxa, unnamed taxa 44 in psittacine birds, 102
blackhead disease collection and isolation in the field, 242
collection and isolation in the field, 242
control and treatment measures for, 281
earthworms and, 281
in broilers, 281
in chickens, 281
in turkeys, 281
increasing since ban of nitarsone, 281
natural food/water additives to control, 281
prevention in turkeys and chickens, 281
vaccination against, 281
Blastocystis spp and intestinal microbiota in chickens, 428
bleach powder in footbaths
effect on persistence of avian influenza in, 64
blue macaw
Pasteurellaceae in, 102
blue-fronted amazon Pasteurellaceae in, 102
blue-winged teal avian influenza in, 128
boot disinfection effect on persistence of avian influenza, 64
Branta canadensis H5N1 in, 83
Brazil systemic histomoniasis in a peafowl from, 325
broilers
and ostriches in Iran, 387
Avian metapneumovirus (aMPV) in Romanian, 250
bedding material and avian influenza in, 64
Campyloctobacter coli meat contamination in Thailand, 186
Campyloctobacter jejuni meat contamination in Thailand, 186
Clostridium perfringens in, 178, 453
control of tibial dyschondroplasia in, 372
copper sulfate to treat H. meleagridis in, 281
E. coli infections in embryos, 472
Eimeria spp oocysts in litter and immunization strategy, 214

Persistence in bedding materials, 64
Persistence in footbaths, 64
Persistence in layer flocks, 64
Persistence in sediment, 520
Surveillance for, in birds in Delmarva Peninsula, 83, 128
Transmission through dust, 198
type A, 83
Wild bird surveillance program for, 83, 128, 520
Avian metapneumovirus (aMPV) circulating in vaccinated Romanian broiler flock, 250
first detection of Subtype B in Greece, 409
vaccine escaping subtype B strains in Europe, 250
Avibacterium paragallinarum
and Gallibacterium anatis, 55, 335
detected using in situ hybridization (ISH) technique, 335
with coinfections, 3, 55, 335
avian paramyxovirus (APMV-1)
clinical signs in ducks, 33
genotype IX, 16, 33
isolated in Peru, 16
mortality in Cherry Valley duck, 33
mortality in Muscovy duck, 33
mortality in Sheldrake, 33
novel subgenotypes, 16
pathogenicity testing, 16
phylogenetic analysis of, 16, 25
repeat challenge of vaccinated birds, 245
serotypes 2, 6, and 10, 296
vaccine escaping subtype B strains in Europe, 250
Avipoxvirus
detected from tongue of canary, 531
avian influenza virus in, 64
Belgium
Goose hemorrhagic polyomavirus, 536
beta-lactams resistance to, 391
Bifidobacterium spp
interactions with parasites in chickens, 428
biochemistry reference intervals for ring-necked pheasants, 211
biosecurity
concerns, 16, 40, 281
measures and protocols, 46, 64, 198, 261, 531
training system-wide, 198
bird feeder
role in transmission of disease, 311, 347
Bisgaard taxa, unnamed taxa 44 in psittacine birds, 102
blackhead disease
collection and isolation in the field, 242
collection and isolation in the field, 242
control and treatment measures for, 281
earthworms and, 281
in broilers, 281
in chickens, 281
in turkeys, 281
increasing since ban of nitarsone, 281
natural food/water additives to control, 281
prevention in turkeys and chickens, 281
vaccination against, 281
Blastocystis spp and intestinal microbiota in chickens, 428
bleach powder in footbaths
effect on persistence of avian influenza in, 64
blue macaw
Pasteurellaceae in, 102
blue-fron...
Enterococcus faecalis infections in embryos, 472
Enterococcus spp infections in embryos, 472
fibrosis of muscle in breast of, 481
fowl adenoviruses and inclusion body hepatitis in, 512
fowl adenoviruses in flocks from China, 341, 353
fowl adenoviruses in flocks in Iran, 205
Heterakis gallinarum in, 281
Histomonas meleagridis in, 281
immunity—susceptibility to infectious bronchitis, 358
Moroccan-Italy 02 infectious bronchitis virus challenge, 466
novel IVB variants in vaccinated flocks of, 472
novel protein, perforin, in, 387
pectoralis major in wooden breast in, 481
novel IVB variants in embryos, 472
Enterococcus spp infections in embryos, 472
Enterococcus faecalis infections in embryos, 472
Enterococcus spp infections in embryos, 472
Escherichia coli infection in neonatal chicks, 503
fowl adenoviruses in, 205, 341, 353, 512
fowl choler in, 457, 491
gut or intestinal cell cultures, 229
HSN1 in two chicken layer farms in Lebanon, 271
HSN1 in village flocks in Mali, 165
healthy intestinal microbiota and parasites in, 428
Helococcus ovis in a leghorn rooster, 526
hepatitis associated with cocci in, 526
Heterakis gallinarum in, 281
Histomonas meleagridis in, 281
housing systems for, 348
in vitro and in vivo pathogen-host models, 229
infectious bronchitis in, 358, 442, 466
immunity—susceptibility to infectious bronchitis, 358
inbred line 077/B19 susceptible to IBV, 358
inclusion body hepatitis in young chicks, 205
intraepithelial delivery of CpG-ODN to 1 day old chicks, 503
liver injury in, 491
major histocompatibility complex (MHC) genes in, 358
Marek’s disease in, 107, 153
meningitis in, 135
mixed infections in, 3, 55, 335
necrotic hepatitis in, 491
Newcastle disease in vaccinated, 245, 296
Newcastle disease in village flocks in Mali, 165
normal mortality in commercial egg-laying, 289
novel protein, perforin, in, 387
parasites and bacteria interactions in, 428
Pasteurella multocida in, 457, 491
protective immunity to E. coli in, 503
recombinant Newcastle disease virus in, 296
respiratory disease, 335, 466
signs of imminent death in, 316
simultaneous infections, 55
small flock characteristics, 46
specific-pathogen-free, 466
vaccine efficacy against IBV, 466
vaccine vector for highly pathogenic AIV in, 296
vaccination of chicks, 117, 466
valvular vegetative endocarditis associated with cocci, 526
welfare parameters for, 316, 366
white chick syndrome in, 402
chondrocytes
treatment with danshen and apigenin, 372
ciprofloxacin
resistance to, 186
clinical disease
reproduction of, 1
clean and disinfect process
in US turkey farms, 198
clonality
of mycoplasma synoviae, 25
cloning virus genes
for vaccine vector, 296
Clostridium perfringens
bacterial levels in feed and challenge with, 453
effect if Eimeria spp on, 428
harboring novel genes in, 387
perforin genes detected with isolates in broiler chickens and ostriches, 178
strains isolated from broiler chickens, 178
virulence associated with secreted toxins, 387
Chlamydia psittaci
genotype B pathogen, 40
in pigeons, 40
phylogenetic analysis of, 40
survival at various temperatures, 40
coccidiosis
cause of normal mortality in chickens, 289
coccidiosis
control of, 214, 237, 281
cockatiels
parrot bornavirus in, 90
coinfections in poultry
A. paragallinarum with G. anatis in, 55, 335
avian metapneumovirus with mycoplasma gallisepticum, 250
bacterial, 55, 335
clinical signs in a chicken model, 335
complications of 3, 55
effect of timing on, 3
Eimeria coinfections, 178
Escherichia coli and H. meleagridis, 281
colibacillosis
in chicks from Japan, 135
Colinus virginianus
antimicrobial resistance in, 391
colistin
resistance to, 186
collagen
in broiler wooden breast fibrotic myopathy, 481
Columba livia domestica
Chlamydia psittaci in, 40
multicentric lymphosarcoma in, 267
Columbidae
c coli and H. meleagridis, 281
colibacillosis
in chicks from Japan, 135
Colinus virginianus
antimicrobial resistance in, 391
colistin
resistance to, 186
collagen
in broiler wooden breast fibrotic myopathy, 481
Deltaproteobacteria
for control of tibial dyschondroplasia, 372
dead bird handling
increased risk of H5N2 avian influenza spread, 198
Delmarva Peninsula
AIV surveillance, 83, 128, 520
Denmark
Pasteurellaceae in captive birds from, 102
densely populated poultry area (DPPA)
in Italy, 261
Dimetridazole
past control of H. meleagridis, 281
disease severity
effect of coinfections in chickens, 55, 335
disease spread
air movement in, 198
aquatic waterfowl habitat, 520
bird shows, 531
close proximity of poultry farms, 198
equipment and staff sharing, 198
host mediated, 281
lateral, 198, 281
rapid containment, 261
spilled contaminated feed, 531
stocking densities and, 366
vertical, 205
disinfectants in footbaths
effect on persistence of avian influenza, 64
doxycycline
resistance to, 186
dry medium for field isolation of parasites, 242
duck-origin gIX isolate
of avian paramyxovirus type 1, 33
ducks
avian influenza in, 165
coinfections with low pathogenic avian influenza in, 3
H5N1 in wild, 83
low pathogenic avian influenza isolates in, 128
mixed infections in, 3
Newcastle disease in, 165
Pasteurella multocida in, 457
small flock characteristics, 46
Streptococcus gallolyticus subsp. pasteurianus infection in, 115
ducks and geese
small flock characteristics, 46
dust
increased risk of H5N2 transmission through, 198
replicating in experimental conditions, 3
sampling for MDC surveillance, 153
Dwyer medium
for field isolation of parasites, 242, 244
dyspnea
sign of imminent death in chicks, 316
Subject Index
cpb2 toxin gene, in Clostridium perfringens strains, 178
CpG-ODN immunostimulation
for protection against septicemia, 503
cutaneous leiomyosarcoma
in a pigeon, 274
Cyanocitta cristata
Salmonella spp in, 347
Trichomonas in, 347
cysteine-containing aspartic proteolytic enzymes (caspases), 491
cytosine phosphodiester guanine (CpG)
role in apoptosis in fowl cholera liver injury, 503
daily mortality
in egg producing chickens, 289
damage-associated molecular patterns (DAMPs),
host mediated, 281
economic loss
due to embryo mortality in broilers, 472
due to H5N2 outbreak in turkey farms, 198
due to infections, 3, 409
due to white chick syndrome, 402
egg bound
cause of normal mortality in chickens, 289
egg laying poultry flocks
prevalence of *Salmonella* serovars in, 366
egg production
decrease due to *Avian metapneumovirus*, 409
decrease due to white chick syndrome, 402
egg quality assurance programs
to minimize SE contamination of shell eggs, 330
egg yolk peritonitis
cause of normal mortality in chickens, 289
Egypt
IBV in broiler flocks in, 307
*Eimeria* CP dual infection
chicken model, 178
*Eimeria acervulina*
interactions with bacteria in chickens, 428
ocysts in litter, 214
*Eimeria brunett*
effect on bacterial diversity in chickens, 428
*Eimeria maxima*
interactions with bacteria in chickens, 428
microscores compared to broiler body weights and gross lesion scores, 237
ocyst numbers in litter and chick mortality, 214
*Eimeria oocyst vaccine*
in broilers, 214
*Eimeria praevox*
ocysts in litter, 214
*Eimeria spp.*
infection exacerbates blackhead, 281
interactions with bacteria in chickens, 428
ocysts in litter 214
species composition in litter, 214
*Eimeria tenella*
ocysts in litter, 214
emergency vaccination
for avian influenza virus, 296
for *avipoxvirus*, 531
enrofloxacin
resistance to, 186
*Enterococcus*
antimicrobial resistance in northern bobwhites, 391
infection in nonviable broiler embryos, 472
Enterovacter (Aerobacter)
interactions with parasites, 428
epidemiology
Marek’s disease in commercial poultry farms, 153
mycoplasma synoviae outbreaks, 25
pigeon paramyxovirus type-1 viruses (PPMV-1), 146
*Escherichia coli*
antimicrobial resistance in northern bobwhites, 391
coinfection with avian influenza, 3
experimental infection of broilers, 316
*Helicobacter pullorum* infection satellite around, 526
interactions with parasites in chickens, 428
intrapulmonary delivery of CpG-ODN microdroplets against, 503
involved in daily mortality of chickens, 289
meningitis in chicks from Japan, 135
protective immunity in neonatal chicks, 503
EU979375 strain of FAdV-8b
in chicks in Iran, 205
EU979378 strain of FAdV-11
in chicks in Iran, 205
European avian coronavirus research, 145
experimental infection
in *vivo*, 3

State of conduct, 1, 279, 414
with coinfecting pathogens, 2
with *Escherichia coli*, 316
with FAdV-8 serotype in chickens, 353
with fowl adenovirus, 512
with infectious bronchitis virus, 358, 466
with low pathogenic avian influenza virus, 3
*Pasteurella multocida* in laying hens, 491
with *Pasteurella multocida* in mice, 457
with *Salmonella* serovars, 366
exsanguination
cause of normal mortality in chickens, 289
*Faecalibacterium prausnitzi*
effect of parasites on, 428
fantail pigeon
cutaneous leiomyosarcoma in, 274
fattening turkey farm
*H7N7* case in, 261
fatty liver syndrome
cause of normal mortality in chickens, 289
FDA Egg Rule
to minimize SE contamination of shell eggs, 330
fecal shedding
*Salmonella* serovars, 366
feces
survival of avian influenza virus in, 64
feeder birds
role in transmission of disease 347
fibrosis
role in wooden breast in broilers 481
fighting birds
reservoir of NDV strains, 16
florfenicol
resistance to, 391
fluoroquinolones
resistance, 186
footbaths
disinfecting for AIV, 64
fowl adenovirus
FAdV-1, FAdV-8b, and FAdV-11, 512
histologic lesions induced by, 512
strains C and E in China, 341
strains D and E in Iran, 205
fowl cholera
isolates from Hungary, 457
liver injury in a chickens due to, 491
free-ranging laying hen farm
*H7N7* case in, 261
fungal infections
in poultry, 77
*Gallibacterium anatis*
coinfections with, 3
with *Avibacterium paragallinarum*, 55
*Gallid herpesvirus 1* (GaHV-1)
lesions in gastrointestinal tract of chickens, 255
Gadwall
avian influenza virus in a, 128
Gallus gallus domesticus
HPAIV in, 3
*Pasteurella multocida* in, 457
small flocks in Alberta, Canada, 46
gastrointestinal tract of chickens
cell culture model from, 229
goose
avian influenza in Mali village flocks, 165
hemorrhagic nephritis enteritis in Belgium, 536
hemorrhagic polyomavirus in Belgium, 536
Newcastle disease in Mali village flocks, 165
*Pasteurella multocida* in, 457
small flocks in Canada, 46
Subject Index

H18N11
- in bats, 3

*Haemorhous mexicanus*
- Mycoplasma gallisepticum in, 437
- *trichomonas* in, 347

hatchery,
- chick syndrome in 402
- heat-shock protein 90 (Hsp90) role in tibial dyschondroplasia, 372

*Helcococcus ovis*
- in a leghorn chicken from a backyard flock, 526
- herpesvirus in chickens, 107, 153

*Heterakis gallinarum* containing *H. meleagridis*, 281
- hexon gene sequence in FADVs isolates in China, 205
- in FADVs isolates in Iran, 205

*highly pathogenic avian influenza virus* (HPAIV), among turkey farms in 2015, 198
- among turkey farms in Indiana, 414
- coinfections with, 3
- early detection of, 83
- H5N1 in two chicken layer farms in Lebanon, 271
- H7N7 in Italy on Poultry farms, 261
- in the Delmarva Peninsula, 83
- in village flocks from Mali, 165
- in wild birds, 83
- persistence in bedding and feces, 64
- persistence in footbath water, 64
- protective immunity against, 296
- recombinant NDV vaccine vector for in chickens, 296

*Histomonas gallinarum* role in *H. meleagridis* survival, 281

*Histomonas meleagridis*,
- blackhead disease and, 242
- dependence on bacteria, 428
- review of lifecycle, 281

Histomoniasis
- control measures for, 281
- earthworms and, 281
- in a peafowl from Brazil, 325
- prevention in turkeys and chickens, 281
- vaccination against, 281

histopathology
- in diagnosis 135, 274, 335

hooded warbler
- *listeria* in, 347

host
- experimental infection, 1
- house finch
  - *Mycoplasma gallisepticum* in, 437
- house sparrow,
  - *Salmonella* in, 347

HPAIV, see highly pathogenic avian influenza virus

hosts
