BioOne Complete ([complete.BioOne.org](http://complete.BioOne.org)) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at [www.bioone.org/terms-o-use](http://www.bioone.org/terms-o-use).

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

---

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

## Obituaries

### Pierre Dandelot (2007)

Pierre Dandelot, who died in 2007, was a superb painter, sculptor and taxidermist of animals, especially primates. In “A Field Guide to the Larger Mammals of Africa” (1970), his colour paintings and black-and-white drawings, complementing the text by Jean Dorst, established the precedent that beautiful yet accurate artwork can reveal as much or more about an animal as can a photograph—thus starting a tradition which is still today upheld by notable artists such as Stephen Nash. Pierre was enthusiastic about the animals themselves, and even published a few papers on the taxonomy of African monkeys, in which, as an artist, he showed that he was able to detect significant features which had been missed by standard taxonomists: as he put it, “ils n’ont pas l’oeil” (“they do not have the eye”).

Colin P. Groves, Canberra, Australia

Sketches by Pierre Dandelot. Faces of red colobus monkeys—comparing *badius* and *waldronae*. Original with Colin P. Groves.

Sketches by Pierre Dandelot. Angola colobus, *Colobus angolensis*. Top left. Labeled “*angolensis*, *adolphi-frederici* and *palliatius*”. The form *adolphi-frederici* is considered a junior synonym of *C. a. ruwenzorii* by Groves (2001, *Primate Taxonomy*, Smithsonian Institution Press, Washington, DC). Groves (2001) lists the form *palliatius* as a subspecies of *Colobus angolensis*. Top right. Labeled *angolensis*. Bottom left and right. Labeled *cottoni*. Considered a subspecies of *C. angolensis* by Groves (2001). Original with Colin P. Groves.

Sketches by Pierre Dandelot. Three black and white colobus, labeled *C.[olobus] ab.[y]ssinicus uelensis [sic]* male (center and left) and *C.[olobus] ab.[y]ssinicus kikuyuensis* female Aberdares Mts. (right). Groves (2001, *Primate Taxonomy*, Smithsonian Institution Press, Washington, DC) places both as subspecies of *Colobus guereza*; the former, as *uelensis* Matschie, as a junior synonym of *C. g. occidentalis*. Original with Colin P. Groves.
