From "white dunes" to "grey dunes": these dynamic foredunes with Marram grass near Hook of Holland will undergo a new development as more inland and stable dunes. Between 2008–2009, a new dune area of 250 m wide and 1500 m long was created between them and the North Sea (top left) by beach nourishment. The nourishment (6 million m³) was constructed as a compensation for the loss of rare dune environments nearby, which are under protection of the European Natura 2000 network. These losses were predicted as amongst the impacts of the new harbour developments of the port of Rotterdam (extension Maasvlakte 2). In the management plan for the new dune area, these foredunes (at present named "white dunes" with mobile sand and *Ammophila arenaria*, Marram grass) will gradually develop into "grey dunes" (mainly stable with species-rich short moss- and grassland). Besides grey dunes, the new dune area also aims at the development of rare moist dune valley vegetation.

Members are individuals that support the aims of the foundation through personal and group efforts or by donations. Memberships are available at all levels. For more information, visit www.cerf.org.

The Journal of Coastal Research (ISSN 0749-0208) is the official peer-reviewed publication of The Coastal Education and Research Foundation (CERF). CERF is a 501(c) (3) non-profit organization that promotes the study and management of coastal and marine environments through research, education, and cooperation. Information on membership, subscriptions, and advertising can be found at www.cerf.org. CERF supports scientific investigation and does not endorse the views of its contributors. This publication is available through Bioone, Inc. (www.bioone.org) and subscription information can be found at www.bioone.org.

The journal is published quarterly. All rights reserved. **Aims and Scope of the Journal**

*Journal of Coastal Research*, an International Forum for the Littoral Sciences, is dedicated to all aspects of coastal research. These include geology, biology, geomorphology (physical geography), climate, littoral oceanography, hydrography, coastal hydraulics, environmental (resource) management, engineering, and remote sensing. Although each field functions effectively within its own purview, the cross-disciplinary nature of coastal studies requires familiarity with other fields as well. Hence, the scope of topics is necessarily broad in order to address the complexity of coastal biophysical and socio-economic interactions. Because of the wide range of interrelated topics, the journal invites original contributions and manuscripts dealing with theory, methodology, techniques, and field or applied topic studies on interdisciplinary coastal issues.

The journal encourages the dissemination of knowledge and understanding of the coastal zone by promoting cooperation and communication between specialists in different disciplines. Natural scientists, for example, are encouraged to collaborate with professionals in other fields to prepare contributions relating to the coastal zone that foster increased appreciation of coastal environments and processes. By means of this journal, with its scholarly and professional papers, systematic review articles, book and symposia reviews, communications and news, and special topical issues, an international forum for the development of integrated coastal research is provided.

**Advertising, Editorial, and Subscription Information**

**Advertising and Editorial Office**: All advertising and editorial correspondence should be sent to Dr. Charles W. Finkl, Editor-in-Chief, *Journal of Coastal Research*, 1656 Cypress Row Drive, West Palm Beach, FL 33411, U.S.A. PHONE: 561.313.0926. E-MAIL: CFinkl@CERF-JCR.com.

**Subscription Information**: The *Journal of Coastal Research* is a bimonthly publication. Calendar-year (2012) print and online subscription prices for the JCR are: $115.00 for US CERF members / $125.00 for International CERF members ($95.00 for online only), and $519.00 for US institutions / $541.00 for International institutions ($437.00 for online only). Additional surface charges may apply to subscribers located outside of the USA. For additional membership and subscription forms and information, please go to www.CERF-JCR.org. To obtain a membership or subscription form by mail, please send request to *Journal of Coastal Research*, P.O. Box 7065, Lawrence, KS 66044. Back Issues and Special Issues of the JCR, when available, can be directly purchased at www.CERF-JCR.org.

The *Journal of Coastal Research* is currently surveyed in Applied Science & Technology Abstracts; Applied Science & Technology Index (H.W. Wilson); Aquatic Sciences & Fisheries Abstracts; BIOBASE; Biological Abstracts; BIOSIS Previews (Thomson); CAB International Abstracts (CABI); CSA Civil Engineering Abstracts (ProQuest); Current Awareness in Biological Sciences (Elsevier); Current Contents/Agriculture, Biology, & Environmental Sciences (Thomson); Ecology Abstracts (ProQuest); Environmental Sciences & Pollution Management; GeoAbstracts [Geographical Abstracts: Physical Geography; Ecological Abstracts; Geological Abstracts; GEOBASE (Elsevier); GeoRef; Meteorological & Geoastrophysical Abstracts (ProQuest); Oceanic Abstracts (ProQuest); Oceanographic Literature Review (Elsevier); Physical Sciences Digest (CSA, Ebsco); Pollution Abstracts (ProQuest); Referativnyi Zhurnal; Science Citation Index; SciSearch (Thomson); SCOPUS; Water Resources Abstracts (Bethesda); Zoological Record (Thomson).
