Journal of Coastal Research

Proceedings of the 14th International Coastal Symposium
Sydney, 6-11 March 2016

Edited by:
Ana Vila-Concejo, Eleanor Bruce, David M. Kennedy, and R. Jak McCarroll
The Journal of Coastal Research is a peer-reviewed scientific journal that publishes original research on coastal and marine environments, focusing on natural and human-induced changes, processes, and systems. It covers a wide range of topics including coastal geomorphology, sedimentology, marine biology, oceanography, and environmental science. The journal aims to provide a platform for interdisciplinary research and to foster the exchange of ideas and knowledge among coastal scientists worldwide.
Aims and Scope of the Journal

The Journal of Coastal Research (JCR), an International Forum for the Littoral Sciences, is dedicated to all aspects of coastal research. These include geology, biology, geomorphology (physical geography), climate, littoral oceanography, hydrography, coastal hydraulics, environmental (resource) management, engineering, and remote sensing. Although each field functions effectively within its own purview, the cross-disciplinary nature of coastal studies requires familiarity with other fields as well. Hence, the scope of topics is necessarily broad in order to address the complexity of coastal biophysical and socio-economic interactions. Because of the wide range of interrelated topics, the journal invites original contributions and manuscripts dealing with theory, methodology, techniques, and field or applied topic studies on interdisciplinary coastal issues.

The journal encourages the dissemination of knowledge and understanding of the coastal zone by promoting cooperation and communication between specialists in different disciplines. Natural scientists, for example, are encouraged to collaborate with professionals in other fields to prepare contributions relating to the coastal zone that foster increased appreciation of coastal environments and processes. By means of this journal, with its scholarly and professional orientation, a focused approach is provided. An international forum for the development of integrated coastal research is provided.

Advertising, Editorial, and Subscription Information

Advertising, Editorial, and Office: All advertising and editorial correspondence should be sent to Dr. Charles W. Finkl, Editor-in-Chief, Journal of Coastal Research, 5130 NW 54th Street, Coconut Creek, FL 33073, U.S.A. PHONE: 828-333-2300. E-MAIL: cfinkl@cerf-jcr.com

Submission Information: The Journal of Coastal Research is a bimonthly publication. Calendar-year (2016) print and online subscription prices for the JCR are: $115.00 for US CERF members / $125.00 for International CERF members ($95.00 for online only), and $519.00 for US institutions / $541.00 for International institutions ($437.00 for online only). Additional surface charges may apply to subscribers located outside of the USA. For additional membership and subscription forms and information, please go to www.CERF-JCR.org. To obtain a membership or subscription form by mail, please send request to Journal of Coastal Research, P.O. Box 7065, Lawrence, KS 66044. Back Issues and Special Issues of the JCR, when available, can be directly purchased at www.CERF-JCR.org.
Acknowledgements

Putting these volumes together has required a lot of effort, dedication and enthusiasm. We would like to thank everyone involved in this process: Lee Devereux, Andrew Broderick, Tommy Fellowes, Jordan Gacutan, Madi Patterson, Steph Duce, Susan Warner. Mandi Thran not only helped with text formatting; she designed the artwork for the cover.
Journal of Coastal Research Special Issue No. 75

14th International Coastal Symposium ICS2016

Sydney, NSW, Australia

6th-11th March 2016

Local Organising Committee

Ana Vila-Concejo, Conference Chair, ARC Future Fellow, Associate Professor, School of Geosciences, The University of Sydney.

Elaine Baker, Professor, UNESCO Chair in Marine Science, School of Geosciences, The University of Sydney.

Eleanor Bruce, Senior Lecturer, School of Geosciences, The University of Sydney.

Ross Coleman, Associate Professor, School of Biological Sciences, The University of Sydney.

Peter Cowell, Associate Professor, School of Geosciences, The University of Sydney.

Filippo Dall’Osso, School of Geosciences, The University of Sydney.

William Figueira, Associate Professor, School of Biological Sciences, The University of Sydney.

Daniel Harris, School of Geosciences, The University of Sydney (Present address MARUM, University of Bremen).

Thomas Hubble, Associate Professor, Pro-Dean, Faculty of Science, School of Geosciences, The University of Sydney.

R Jak McCarroll, Associate Lecturer, School of Geosciences, The University of Sydney.

Phil McManus, Professor, Head of School of Geosciences, The University of Sydney.

Daniel Penny, Senior Lecturer, School of Geosciences, The University of Sydney.

Tristan Salles, Lecturer, School of Geosciences, The University of Sydney.

Andrew Short, Professor, School of Geosciences, The University of Sydney.

Jody M Webster, Associate Professor, School of Geosciences, The University of Sydney.

# TABLE OF CONTENTS

## COASTAL STUDIES UNIT

### The Coastal Studies Unit and Development of the Australian Beach Models

Andrew D. Short .......................................................... 1

### Surfzone-Beach-Dune Interactions: Flow and Sediment Transport Across the Intertidal Beach and Backshore

Patrick A. Hesp and Thomas A.G. Smyth .......................................................... 8

### RIVERS

Using simplified bathymetry and SAR imagery in the validation of a hydraulic model for the Tagus River floodplain

Maria Amélia V.C. Araújo, Rita Pestana, Magda Matias, Dora Roque, António Trigo-Teixeira, and Sandra Heleno ....... 13

Runoff and sediment Transport of Portel-Melgaço Water System in an Amazonian estuarine System

Mauricio S. Costa, Marcelo Rollnic, Yuri O. Prestes, Renan P. Rosário and Thais A. C. Borba ........................................... 18

Acoustic attenuation due to bi-modal size distributions of suspended sediment

Daniel M. Hanes .......................................................................................................................... 23

Simulation of Tsunami Runup in the Tone River Using Generalized Coordinate System and Influence of River Mouth Bar on Tsunami Water Level

Ryuji Nikaido, Shin-ichi Aoki, Hiroshi Tamura, and Masanobu Jinbo .......................................................... 28

### ESTUARIES

GIS-based modelling of vulnerability of coastal wetland ecosystems to environmental changes: Comerong Island, southeastern Australia

Ali K. M. Al-Nasrawi, Brian G. Jones, Sarah M. Hamylton .......................................................................................... 33

Modern sedimentary processes and seasonal variations of organic matter in an urban tropical estuary, Jaboatão River (PE), Brazil

Roberto L. Barcellos, Manuel J. Flores-Montes, Tatiana M. F. Alves, Plinio B. Camargo ...................................................... 38

Runoff quantification on Amazonian Estuary based on hydrodynamic model.

Thais A.C. Borba, and Marcelo Rollnic .......................................................................................................................... 43

Spatiotemporal variation in salinity during drought years in an Amazonian estuary (Taperáçu)

Effective Roughness Height in High-Concentrated Flows

Jiayu Fang, Yongping Chen Peng, Yao, and Min Su .................................................................................................. 53

Mixing and Dispersal of Low Saline Waters in Estuarine Coastal Waters of the Yellow Sea

ChangShik Kim .......................................................................................................................................................... 58

Stratification of tidal influenced navigation channel

Nam-Hoon Kim Jin Hwan Hwang and Hyeuyun Ku .......................................................................................... 63

An Influence of Salinity on Resuspension of Cohesive Sediment

Kyunghoi Kim, Han-sam Yoon, In-Cheol Lee and Tadashi Hibino .................................................................................. 68

Applicability of 3D Beach Evolution Model with Wave-current Interaction to River-mouth Bar Formation

Masamitsu Kuroiwa, Yoko Shibutani, Yoshiyuki Yasumoto, Hajime Mase, and Yuhei Matsubara ........................................... 73

Biological response of a coastal plain estuary to torrential episodes: a modelling study

Longo, R.S., Picado, A., Vaz, N., Dias, J.M. .................................................................................................................. 78

Depositional evolution in an estuarine lagoonal system under a port influence in Northeastern Brazil

Silvio E. M. Martins, Roberto L. Barcellos, Manuel J. Flores-Montes, and Elvis J. de França ...................................................... 83

Changes in the Frequency and Duration of Closures of the Opihi Hapua Following Construction of the Opuha Dam

Sarah L. McSweeney, Deirdre E. Hart, Derek J. Todd and David M. Kennedy .................................................................................. 88

Salinity variation in the macrotidal mixing zone: the Paracauari River estuary, Marajó Island (Northern Brazil)

Sury M. Monteiro and Maãmar El-Robrini .................................................................................................................. 93

The Trophic Status of an Amazonian Estuary Under Anthropogenic Pressure (Brazil)

Marcela C. Monteiro, Luci C. C. Pereira, and José A. Jiménez .......................................................................................... 98

Random Wave-Induced Onshore Scour Characteristics around Submerged Breakwaters on Mild Slopes

Dag Myrhaug and Muk Chen Ong .......................................................................................................................... 103

Downscaled Numerical Modelling to Study the Climate Change Effects on the Estuarine Stratification

Dongmin Jang, Hwan J. Hwang, and Thao T.H. Nguyen .................................................................................................. 108

Use of Groundwater-table To Establish a Buffer Zone In a Barrier Island, Nakdong River Estuary, South Korea

Junghyun Park, Chang-III Yoo and Han-sam Yoon .................................................................................................................. 113
Deposition in Flowing Water of Fine Sediments under Different Salinity Conditions
Luís Ivens Portela, Ana Custódio, and António Trigo Teixeira ................................................................. 118

David and Goliath Revisited: Joint Modelling of the Tagus and Sado Estuaries
Américo S. Ribeiro, Magda C. Sousa, João D. Lencart e Silva and João M. Dias ............................................. 123

Variability of Salinity in Pará River Estuary: 2D Analysis with Flexible Mesh Model
Renan P. Rosário, Thais A.C. Borba, Arthur S. Santos, and Marcelo Rollnic ................................................... 128

Intermittent Estuaries: Linking Hydro-geomorphic Context to Climate Change Resilience
Neil Sanitilam, Kerrylee Rogers, Christina Toms, Eric D. Stein and David Jacobs ........................................... 133

Sediment re-deposition in the mangrove environment of Can Gio, Saigon River estuary (Vietnam)
Klaus Schwarzer, Nguyen Cong Thanh, and Klaus Ricklefs ........................................................................... 138

Environmental Dynamics of the Estuary of the Pacoti River in Ceará, Brazil: Proposals for Management and Environmental Planning
Edson V. Silva, Juliana F. Farias, Larissa N. Barbosa, Victor Gabriel F. Lima and Adryane Gorayeb ...................... 143

Effect of Particle Size on Calibration of Schmidt Number
Minwoo Son, Jisun Byun, Sang Ug Kim, and Eun-Sung Chung ........................................................................ 148

Spatial and Temporal Variability of Residual Volume Transport according to Artificial Freshwater Discharge in Yeoungsan River Estuary, South Korea
Jin Il Song, Jong Wook Kim, Byung Il Yoon, and Seung-Buhm Woo ................................................................. 153

Effects of Sewage on Natural Environments of the Amazon Region (Pará-Brazil)
Natália S. S. Sousa, Marcela C. Monteiro, Adryane Gorayeb, Rauquirio M. Costa, Luci C. C. Pereira ..................... 158

The Change of Tidal Characteristics under the Influence of Human Activities in the Yangtze River Estuary
Ya Tan, F. Yang, Danghan Xie ............................................................................................................................... 163

The Influence of Urban Effluents on the Elemental C/N Ratio in a Tropical Coastal Area of Northeastern Brazil

Application of Terrestrial 3D Laser Scanning to Monitor Changes of Beach Landforms
Hyung-Seok Lee, In-Ho Kim, and Han-Gwn Kim ................................................................................................. 173

Primary production of the benthic microalgae in the bottom sediments of Ria de Aveiro lagoon
Leandro Vaz, Marcos Mateus, João Serôdio, João M. Dias, and Nuno Vaz .............................................................. 178

The Retention and Transport Patterns of Pollutants in the Radial Sand Ridges of the South Yellow Sea
Jie Yang and Jianfeng Tao ........................................................................................................................................ 183

Wind-Induced Water Exchange between Stratified Basins
Jin-Hee Yuk, Shin-ichi Aoki, and Minsoh Joh ........................................................................................................ 188

Numerical Study on the Transport Timescale in a River-influenced Macro-tidal Estuary
Qin Zhang, Jian Feng Tao, and Jie Yang .................................................................................................................... 193

Physical Study on Interactions between Waves and a Well-mixed Seabed
Jisheng Zhang, Ke Sun, Yanyan Zhai, Huashan Zhang, and Chi Zhang ................................................................. 198

Dynamic analysis of riverbed evolution: Chengtong Reach of Yangtze Estuary
Yongping Chen, Jiawen Li, Zhigang Wu and Shunqi Pan ......................................................................................... 203

Integral Tide-Surge-Wave Model of the Yellow Sea for Understanding Local Sediment Transport
Byung Ho Choi, Jin-Hee Yuk, and Kyeong Ok Kim ............................................................................................... 208

Hydraulic and Environmental Stability Analysis in the Estuary of Gahwa River and Sacheon Bay by the Change of Discharge of Namgag Dam in South Korea
Tae Woo Kim, Woo Dong Lee, Dong Soo Hur, Jung Lyul Lee and Jung Sung Yoon ................................................ 213

Short and Medium Term Variation in the Dynamics of the Mesozooplankton Community of an Amazonian Estuary

TIDAL INLETS

An Analytic Approach to Model the Tidal Circulation in a Double-inlet Estuary
Moacyr Araujo, Carmen Medeiros and Jean-Philippe Endres ........................................................................... 223

Records of Migration and Ebb-Delta Breaching at Historic and Ancient Tidal Inlets along a River-Fed Paraglacial Barrier Island
Christopher J. Hein, Gregory G. Fitzsimons, Duncan M. FitzGerald, and Andrew R. Fallon ................................. 228

Evolution of a relocated inlet migrating naturally along an open coast
Chiara Popesso, André Pacheco, Óscar Ferreira, and Giorgio Fontolan ................................................................. 233
Morphological evolution of the Nerang River Entrance ebb-tidal delta
Mahnaz Sedigh, Rodger Tomlinson, Nick Cartright and Amir Etemad-Shahidi ................................................................. 238

ESTURINE BEACHES

Validation of Empirical Wave Run-up Formulas to the Polish Baltic Sea Coast
Paulina Aniskiewicz, Rafal Benedyczak, Kazimierz Furmanczyk, and Pawel Andrzezewski ........................................ 243

Shoreline Change Rate of the Barrier Islands in Nakdong River Estuary over the Southern Part of Korea
Sang-Hun Jeong , Boo-Keun Khim, Yeong-Heon Jo, Beack-Oon Kim, Sang-Ryong Lee and Kwang-Soon Park .......................... 248

Stability of artificial beaches in Port Phillip Bay, Victoria, Australia
Meagan K. Lowe and David M. Kennedy .................................................................................................................... 253

Morphodynamic of a sandy-muddy macrotidal estuarine beach under contrasted energy conditions
(Vilaine estuary, France)
Morio O. , Sedrati M ., Goubert E. , Floch'F. , Furgerot L. and Garlan T. ................................................................. 258

Typhoon Impact and Recovery from Continuous Video Monitoring: a Case Study from Nha Trang Beach, Vietnam
Duong H. Thuan, Le T. Binh, Nguyen T. Viet, Dong K. Hanh, Rafael Almar, and Patrick Marchesiello.......................... 263

DUNES

Downwind Sedimentation and Habitat Development Following Ammophila arenaria Removal and Dune Erosion, Mason Bay, New Zealand
Ella E.C.B. Buckley, Michael J. Hilton, Teresa M. Konlechner and Janice M. Lord .......................................................... 268

Wave Energy as a Control on Dune Development on two Regressive Barriers in Southern Brazil
Sergio Dillonburg, Patrick Hesp, Renato Cecilio, Graziela Miot da Silva............................................................... 273

Foredune Morphological Changes by Offshore Winds Revealed By Ground-Penetrating Radar: Massambaba Beach – Rio de Janeiro, Brazil

Downwind Sedimentation and Habitat Development Following Ammophila arenaria Removal and Dune Erosion, Mason Bay, New Zealand
Lynda M. Hanlon, Lynette K. Abbott, and David M. Kennedy .......................................................................................... 283

Flow within a Trough Blowout at Cape Cod

Dr. Charles W. Finkl is President and Executive Director of the Coastal Education and Research Foundation (CERF), publisher of the JCR. Charlie, a founding editor of the Journal of Coastal Research, has served as Editor-in-Chief for the past 30 years. He is a Research Professor in the Department of Geosciences at Florida Atlantic University in Boca Raton, Florida. He received his Bachelor and Master of Science degrees from Oregon State University and the Ph.D. from the University of Western Australia. He is a member of more than 20 professional societies and has published more than 200 professional papers, books, and reports. He is a Chartered Marine Scientist (CMarSci) [Institute of Marine Engineering, Science and Technology], Certified Professional Geological Scientist (CPGS) [American Institute of Professional Geologists (AIPG)], Certified Professional Soil Scientist (CPSSc) [American Registry of Certified Professionals in Agronomy, Crop, and Soil], and a Professional Wetland Scientist (PWS) [Society of Wetland Scientists]. Charlie has field experience in parts of the USA, Caribbean area, Brazil, Honduras, Russia, South Africa, Western Europe, Australasia, and South Pacific islands. He is also the Series Editor of the Encyclopedia of Earth Sciences Series that is published by Springer (Germany). There are more than twenty-eight volumes in the Series and about twenty-five are available online. Charlie also serves on the Editorial Board of the International Journal of Environmental Studies (Routledge) and is an occasional peer reviewer for many other professional journals.

Charlie has interests and expertise in the general areas of surficial geology, coastal and marine geomorphology (including coastal classification), coastal/marine biophysical environments, exploration geochemistry, soils and weathering (regolith geology), coastal/marine paleoecology, coastal/marine paleoclimatology, and remote sensing (e.g., land cover classification in coastal wetlands, advection-diffusion turbidity plumes in coastal waters, delineation of bottom types and sand resources), effluent disposal and pollution of wetlands and estuaries, water resources mapping and conservation, time series studies of wetland hydroperiod and soil moisture.

Official Meeting of CERF International Coastal Symposium (ICS)

The International Coastal Symposium (ICS) was originally set up by Per Bruun (deceased) and Charlie Finkl as the official meeting of the Coastal Education and Research Foundation (CERF), with one of the first meetings being held in Hilton Head, South Carolina, in 1983. After the repeated success of these meetings, CERF moved the ICS to the international scene holding these conferences in conjunction with local sponsors in Australia, Brazil, Iceland, New Zealand, Northern Ireland, Poland, and Portugal. The ICS brings together delegates from all over the world to collaborate and discuss the most current coastal research studies and projects. During the ICS 2014, which was held in Durban, South Africa, a grand celebration took place to mark the 30th Anniversary of CERF and the JCR. Our next ICS meeting is scheduled for March of 2016 in Sydney, New South Wales, Australia. For more information, please visit www.cerf-jcr.org.
