**Officers of the Foundation**

**President & Executive Director:** Charles W. Finkl

**Senior Vice President & Assistant Director:** Christopher Makowski

**Secretary:** Heather M. Vollmer

**Executive Assistant:** Barbara Russell

**Regional Vice Presidents**

**North America**
- James R. Houston
- Victor V. Klemas
- Orrin H. Pilkey, Jr.

**South America**
- Omar Defeo

**Southeast Asia**
- Nobuo Mimura

**Western Europe**
- Carlos Pereira da Silva
- Michael Phillips
- Marcel J.F. Stive

**Eastern Europe**
- Kazimierz K. Furmanczyk

**Oceania**
- Charles Lemckert
- Vic Semeniuk
- Andrew D. Short

**Board of Directors (Trustees)**

- J. Andrew G. Cooper
- Charles W. Finkl
- Erland J. Frederikson
- Gary B. Griggs
- James R. Houston
- Robert Huff
- Joseph T. Kelley
- Frédéric Bouchette
- Yong-Sik Cho
- Nicholas K. Coch
- Hany Elwany
- Bjorn Kjerfve
- Luis Antonio
- Buenvi-Lopez
- Lindino Benedet

**Lifetime Members**

- Stephen P.
- Charles Thibault
- Leatherman
- Erik van Wollen
- Charles Lemckert
- Ya Ping Wang
- Philip D. Osborne
- Wei Zhang
- Yoshiki Saito

**Patron Members**

- Georges Chapalain
- Norbert P. Pusty
- Carl H. Hobbs, III
- Robert S. Young
- Timothy W. Kana

**CERF Society Information**

The Coastal Education and Research Foundation (CERF) is a nonprofit society dedicated to the advancement of the coastal sciences. The Foundation is devoted to the multi-disciplinary study of the complex problems of the coastal zone. The purpose of CERF is to help translate and interpret coastal issues for the public and to assist professional research and public information programs. The Foundation specifically supports and encourages field and laboratory studies for enlightened coastal management, and encourages their adoption and use.

Because CERF is concerned with broad environmental issues, our efforts concentrate on significant problems such as maintenance of good quality (potable) water with adequate supply, and hazards associated with potential beach erosion, flooding, and susceptibility of developed shorelines to storm surge and wave attack. By focusing attention on these potential man-made and natural hazards, it is hoped that our research efforts will help others improve the quality of life in diverse coastal areas. CERF thus aims to stimulate awareness of coastal (marine and freshwater shorelines) land and water problems; initiate and foster research and innovation to promote long-term coastal productivity; establish an educational forum for the debate of contentious coastal issues; and develop new principles and approaches for enlightened coastal management, and encourage their adoption and use.

**CERF MEMBERSHIP**

Members are individuals that support the aims of the foundation through personal and group efforts or by donations. Memberships are available in different categories with privileges.

Subscription information is available online at www.cerf-jcr.org. Subscriptions office: Allen Press, Inc., P.O. Box 1897, Lawrence, KS 66044, U.S.A. CERF@allenpress.com

**Editor-in-Chief**

Dr. Charles W. Finkl Ph.D., CSci, CMarSci, FIMarEST, CPGeS, CPSSc, PWS, M.ASCE

Charles W. Finkl is President and Executive Director of the Coastal Education and Research Foundation (CERF), publisher of the JCR. Charlie, a founding editor of the Journal of Coastal Research, has served as Editor-in-Chief for the past 30 years. He is a Research Professor in the Department of Geosciences at Florida Atlantic University in Boca Raton, Florida. He received his Bachelor and Master of Science degrees from Oregon State University and the Ph.D. from the University of Western Australia. He is a member of more than 30 professional societies and has published more than 200 professional papers, books, and reports. He is a Chartered Marine Scientist (CMarSci) [Institute of Marine Engineering, Science and Technology], Certified Professional Geological Scientist (CPGeS) [American Institute of Professional Geologists (AIPG)], Certified Professional Soil Scientist (CPSSc) [American Registry of Certified Professionals in Agronomy, Crops, and Soils], and a Professional Wetland Scientist (PWS) [Society of Wetland Scientists]. Charlie has field experience in parts of the USA, Caribbean area, Brazil, Honduras, Russia, South Africa, Western Europe, Australasia, and South Pacific islands. He is also the Series Editor of the Encyclopedia of Earth Sciences Series that is published by Springer (Germany). There are more than twenty-eight volumes in the Series and about twenty-five are available online. Charlie also serves on the Editorial Board of the International Journal of Environmental Studies (Routledge) and is an occasional peer reviewer for many other professional journals.

Charlie has interests and expertise in the general areas of surficial geology, coastal and marine geomorphology (including coastal classification), coastal/marine biophysical environments, exploration geochemistry, soils and weathering (regolith geology), coastal zone management and engineering applications or impacts on natural systems (including erosion control and shore protection), coastal hydrology including submarine freshwater and mineralized seeps, subaerial and marine structural geology, natural hazard mitigation in coastal zones, marine environments and coastal wetland protection and restoration, and remote sensing (e.g., land cover classification in coastal wetlands, advection-diffusion turbidity plumes in coastal waters, delineation of bottom types and sand resources), effluent disposal and pollution of wetlands and estuaries, water resources mapping and conservation, time series studies of wetland hydroperiod and soil moisture.

**Official Meeting of CERF**

**International Coastal Symposium (ICS)**

The International Coastal Symposium (ICS) was originally set up by Per Bruun (deceased) and Charlie Finkl as the official meeting of the Coastal Education and Research Foundation (CERF), with one of the first meetings being held in Hilton Head, South Carolina, in 1993. After the repeated success of these meetings, CERF moved the ICS to the international scene holding these conferences in conjunction with local sponsors in Australia, Brazil, Iceland, New Zealand, Northern Ireland, Poland, and Portugal. The ICS brings together delegates from all over the world to collaborate and discuss the most current coastal research studies and projects. During the ICS 2014, which was held in Durban, South Africa, a grand celebration took place to mark the 30th Anniversary of CERF and the JCR. Our next ICS meeting is scheduled for May of 2018 in Busan, South Korea. For more information, please visit www.cerf-jcr.org.
Introduction: Special Issue on Advances in Topobathymetric Mapping, Models, and Applications

................................. Dean B. Gesch, John C. Brock, Christopher E. Parrish, Jeffrey N. Rogers, and C. Wayne Wright ................................................................. 1

Depth Calibration and Validation of the Experimental Advanced Airborne Research Lidar, EAARL-B

................................................................. C. Wayne Wright, Christine Krannenburg, Timothy A. Battista, and Christopher Parrish 4

Modeling of Airborne Bathymetric Lidar Waveforms

................................................................. Minsu Kim, Yuri Kopilevich, Viktor Feygel's, Joong Yong Park, and Jennifer Wozencraft 18

Optimization of Data Collection and Refinement of Post-processing Techniques for Maritime Canada's First Shallow Water Topographic-bathymetric Lidar Survey

................................................................. Timothy Webster, Kevin McGuigan, Nathan Crowell, Kate Collins, and Candace MacDonald 31

Inland and Near-Shore Water Profiles Derived from the High-Altitude Multiple Altimeter Beam Experimental Lidar (MABEL) ................................. Michael F. Jasinski, Jeremy D. Stoll, William B. Cook, Michael Ondrusek, Eric Stengel, and Kelly Brunt 44

Identifying Bathymetric Differences over Alaska's North Slope using a Satellite-derived Bathymetry Multi-temporal Approach .......................... Shachak Pe’eri, Brian Madore, John Nyberg, Leland Snyder, Christopher Parrish, and Shep Smith 56

Creating a Coastal National Elevation Database (CoNED) for Science and Conservation Applications

................................................................. Cindy A. Thatcher, John C. Brock, Jeffrey J. Danielson, Sandra K. Poppenga, Dean B. Gesch, Monica E. Palaseanu-Lovejoy, John A. Barras, Gayla A. Evans, and Ann E. Gibbs 64

Topobathymetric Elevation Model Development using a New Methodology: Coastal National Elevation Database

................................................................. Jeffrey J. Danielson, Sandra K. Poppenga, John C. Brock, Gayla A. Evans, Dean J. Tyler, Dean B. Gesch, Cindy A. Thatcher, and John A. Barras 75

Hydrologic Connectivity: Quantitative Assessments of Hydrologic-Enforced Drainage Structures in an Elevation Model

................................................................. Sandra K. Poppenga and Bruce B. Worstell 90

Assessment of Elevation Uncertainty in Salt Marsh Environments using Discrete-Return and Full-Waveform Lidar

................................................................. Jeffrey N. Rogers, Christopher E. Parrish, Larry G. Ward, and David M. Burdick 107

Accuracy of Interpolated Bathymetry in Digital Elevation Models

................................................................. Christopher J. Amante and Barry W. Eakins 123

Using Lidar Elevation Data to Develop a Topobathymetric Digital Elevation Model for Sub-Grid Inundation Modeling at Langley Research Center

................................................................. Jon Derek Loftis, Harry V. Wang, Russell J. DeYoung, and William B. Ball 134

Modeling and Simulation of Storm Surge on Staten Island to Understand Inundation Mitigation Strategies

................................................................. Michael E. Kress, Alan I. Benimoff, William J. Fritz, Cindy A. Thatcher, Brian O. Blanton, and Eugene Dzedzits 149

Automatic Delineation of Seacliff Limits using Lidar-derived Highresolution DEMs in Southern California

................................................................. Monica Palaseanu-Lovejoy, Jeff Danielson, Cindy Thatcher, Amy Foxgrover, Patrick Barnard, John Brock, and Adam Young 162

Morphological Expressions of Coastal Cliff Erosion Processes in San Diego County

................................................................. Elizabeth Johnstone, Jessica Raymond, Michael J. Olsen, and Neal Driscoll 174

Fate and Transport of Seacliff Failure Sediment in Southern California

................................................................. Michael J. Olsen, Elizabeth Johnstone, Neal Driscoll, Falko Kuester, and Scott A. Ashford 185

Post-Sandy Benthic Habitat Mapping Using New Topobathymetric Lidar Technology and Object-Based Image Classification

................................................................. Christopher E. Parrish, Jennifer A. Dijkstra, Jarlath P. M. O'Neil-Dunne, Lindsay McKenna, and Shachak Pe’eri 200

Eelgrass and Macroalgal Mapping to Develop Nutrient Criteria in New Hampshire's Estuaries using Hyperspectral Imagery

................................................................. Shachak Pe’eri, J. Ru Morrison, Fred Short, Arthur Mathieson, and Thomas Lippmann 209
