
Guest Editors: Y. Zhi and P.A. Guido Aldana
**Lujiazui Center Area, Shanghai, China.** Lujiazui is located on the bank of the Huangpu River in Pudong New Area, Shanghai City, facing the Bund on the other side of the river. It has become a symbol of modern Shanghai. The Lujiazui Area is a locus of many multinational banks and is one of the most influential financial centers in China. The 2016 International Conference on Water Resource and Environment (WRE2016) was held in this area during July 23rd-26th, 2016. CERF Society Information

The Coastal Education and Research Foundation (CERF) is a nonprofit society dedicated to the advancement of the coastal sciences. The Foundation is devoted to the multi-disciplinary study of the complex problems of the coastal zone. The purpose of CERF is to help translate and interpret coastal issues for the public and to assist professional research and public information programs. The Foundation specifically supports and encourages field and laboratory studies on a local, national, and international basis. Through the medium of scientific publications, television, and radio CERF brings accurate information to the public and coastal specialists on all aspects of coastal issues in an effort to maintain or improve the quality of shoreline resources.

Because CERF is concerned with broad environmental issues, our efforts concentrate on significant problems such as maintenance of good quality (potable) water with adequate supply, and hazards associated with potential beach erosion, flooding, and susceptibility of developed shorelines to storm surge and wave attack. By focusing attention on these potential man-made and natural hazards, it is hoped that our research efforts will help others improve the quality of life in diverse coastal areas. CERF thus aims to stimulate awareness of coastal (marine and fresh water shorelines) land and water problems; initiate and foster research and innovation to promote long-term coastal productivity; establish an educational forum for the debate of contentious coastal issues; and develop new principles and approaches for enlightened coastal management, and encourage their adoption and use.

Members are individuals that support the aims of the foundation through personal and group efforts or by donations. Memberships are available in different categories with privileges.

Subscription information is available online at www.cerf-jcr.org. Subscriptions office: Allen Press, Inc., P.O. Box 1897, Lawrence, KS 66044, U.S.A. CERF@allenpress.com

Editor-in-Chief

Charles W. Finkl Ph.D., CSci, CMarSci, FIMarEST, CPGS, CPSSc, PWS, MASCE

Dr. Charles W. Finkl is President and Executive Director of the Coastal Education and Research Foundation (CERF), publisher of the JCR. Charlie, a founding editor of the Journal of Coastal Research, has served as Editor-in-Chief for the past 33 years. He is a Research Professor in the Department of Geosciences at Florida Atlantic University in Boca Raton, Florida. He received his Bachelor and Master of Science degrees from Oregon State University and the Ph.D. from the University of Western Australia. He is a member of more than 20 professional societies and has published more than 200 professional papers, books, and reports. He is a Chartered Marine Scientist (CMarSci) [Institute of Marine Engineering, Science and Technology], Certified Professional Geoscientist (CPGS) [American Institute of Professional Geologists (AIPG)], Certified Professional Soil Scientist (CPSSc) [American Registry of Certified Professionals in Agronomy, Crops, and Soils], and a Professional Wetland Scientist (PWS) [Society of Wetland Scientists]. Charlie has field experience in parts of the USA, Caribbean area, Brazil, Honduras, Russia, South Africa, Western Europe, Australia, and South Pacific islands. He is also the Series Editor of the Encyclopedia of Earth Sciences Series that is published by Springer (Germany). There are more than twenty-eight volumes in the Series and about twenty-five are available online. Charlie also serves on the Editorial Board of the International Journal of Environmental Studies (Routledge) and is an occasional peer reviewer for many other professional journals.

Charlie has interests and expertise in the general areas of surficial geology, coastal and marine geomorphology (including coastal classification), coastal/marine biophysical environments, exploration geochemistry, soils and weathering (regolith geology), coastal zone management and engineering applications or impacts on natural systems (including erosion control and shore protection), coastal hydrology including submarine freshwater and mineralized seeps, subaerial and marine structural geology, natural hazard mitigation in coastal zones, marine environments and coastal wetland protection and restoration, and remote sensing (e.g., land cover classification in coastal wetlands, advection-diffusion turbidity plumes in coastal waters, delineation of bottom types and sand resources), effluent disposal and pollution of wetlands and estuaries, water resources mapping and conservation, time series studies of wetland hydroperiod and soil moisture.

International Coastal Symposium (ICS)

Official Meeting of CERF

The International Coastal Symposium (ICS) was originally set up by Per Bruun (deceased) and Charlie Finkl as the official meeting of the Coastal Education and Research Foundation (CERF), with one of the first meetings being held in Hilton Head, South Carolina, in 1993. After the repeated success of these meetings, CERF moved the ICS to the international scene holding these conferences in conjunction with local sponsors in Australia, Brazil, Iceland, New Zealand, Northern Ireland, Poland, and Portugal. The ICS brings together delegates from all over the world to collaborate and discuss the most current coastal research studies and projects. During the ICS 2014, which was held in Durban, South Africa, a grand celebration took place to mark the 30th Anniversary of CERF and the JCR. Our next ICS meeting is scheduled for May of 2018 in Busan, South Korea. For more information, please visit www.cerf-jcr.org.
Journal of Coastal Research, an International Forum for the Littoral Sciences, is dedicated to all aspects of coastal research. These include geology, biology, geomorphology (physical geography), climate, littoral oceanography, hydrography, coastal hydraulics, environmental (resource) management, engineering, and remote sensing. Although each field functions effectively within its own purview, the cross-disciplinary nature of coastal studies requires familiarity with other fields as well. Hence, the scope of topics is necessarily broad in order to address the complexity of coastal biophysical and socio-economic interactions. Because of the wide range of interrelated topics, the journal invites original contributions and manuscripts dealing with theory, methodology, techniques, and field or applied topic studies on interdisciplinary coastal issues.

The journal encourages the dissemination of knowledge and understanding of the coastal zone by promoting cooperation and communication between specialists in different disciplines. Natural scientists, for example, are encouraged to collaborate with professionals in other fields to prepare contributions relating to the coastal zone that foster increased appreciation of coastal environments and processes. By means of this journal, with its scholarly and professional papers, systematic review articles, book and symposia reviews, communications and news, and special topical issues, an international forum for the development of integrated coastal research is provided.

Advertising, Editorial, and Subscription Information

Adverting and Editorial Office: All advertising and editorial correspondence should be sent to Dr. Charles W. Finkl, Editor-in-Chief, Journal of Coastal Research, 5130 NW 54th Street, Coconut Creek, FL 33073, U.S.A. PHONE: 828-333-2300. E-MAIL: cfinkl@cerf-jcr.com

Subscription Information: The Journal of Coastal Research is a bimonthly publication. Calendar-year (2017) print and online subscription prices for the JCR are: $115.00 for US CERF members / $125.00 for International CERF members ($95.00 for online only), and $519.00 for US institutions / $541.00 for International institutions ($437.00 for online only). Additional surface charges may apply to subscribers located outside of the USA. For additional membership and subscription forms and information, please go to www.CERF-JCR.org. To obtain a membership or subscription form by mail, please send request to Journal of Coastal Research, P.O. Box 7065, Lawrence, KS 66044. Back Issues and Special Issues of the JCR, when available, can be directly purchased at www.CERF-JCR.org.
CONTENTS

Detection of Carbofuran Pesticide in Seawater by Using an Enzyme Biosensor........................................................................Zhuang Li, Song Qu, Lei Cui, and Shuping Zhang ................................................................. 1

Integrated Weighting Technique for Coastal Vulnerability to Storm Surges...................................................................................... Shun Yuan, Jing Guo, and Xin Zhao .......................................................... 6

Early Influence of Heat Transport of the Kuroshio at the Source Area on Summer Precipitation over Eastern China.......................................................... Qinghua Qi, Rongshuo Cai, and Xiuhua Yan ........................................... 13

Summer Rainfall Anomaly over Eastern China Teleconnected with Air-Sea Flux in East-Asia Seas.......................................................... Qinghua Qi, Rongshuo Cai, and Yashu Bai .................................................. 18

Ecological Functions of Different Shrublands in the Chenier Coastal Wetlands, China.............................................................. Yanyun Zhao and Ying Fang .......................................................... 24

Response of Runoff and Sediment Yield from Climate Change in the Yanhe Watershed, China........................................................................... Zongping Ren, Zhaohong Feng, Peng Li, Dan Wang, Shengdong Cheng, and Junfu Gong .......................................................... 30

Spatial-Temporal Variation Characteristics of NPP in the Helhe River Basin, Northwestern China, in a Recent 10-Year Period Calculated by CASA Model......................................................................................................................... Wei Liu, Qi Feng, and Fuping Zhang .......................................................... 36

Nearshore Wave Forecast for Xiamen, China........................................................................................................................................Zhifeng Wang, Kejian Wu, Shanhong Gao, and Qingjie Li ........................................................... 48

Determining a More Environmental than Spatial Influence on Structuring Fish Communities and Ecological Boundaries of Fangcheng Coastal Waters, Northern South China Sea........................................................................ Xuefeng Wang, Lifei Wang, Huaigang Chen, Xiaoping Jia, and Donald A. Jackson ........................................................... 55

Variation of Precipitation and Streamflow in the Upper and Middle Huaihe River Basin, China, from 1959-2009........................................................... Guiyang An and Zhenchun Hao ........................................................ 69

Application of a Load Duration Curve for Establishing TMDI Programs Upstream of the Xiaoxi River within the Taihu Watershed, China........................... Yang Luo and Jianying Zhang ............................................................. 80

Storm Surge along the Yellow River Delta under Directional Extreme Wind Conditions.............................................................. Zhifeng Wang, Liangming Zhou, Qingjie Li, and Xiaojuan Sun ............................................................. 86

Response of Surface Ocean Conditions to Typhoon Rammasun (2014)........................................................................................................ Yu Xu and Zhifeng Wang ............................................................. 92

Numerical Study on the Influences of Hydrodynamic Factors on Water Age in the Liao River Estuary, China.......................................................... Rui Liu, Xueqing Zhang, Bingchen Liang, Li Xin, and Yang Zhao ............................................................. 98
