CERF Society Information

The Coastal Education and Research Foundation (CERF) is a nonprofit society dedicated to the advancement of the coastal sciences. The Foundation is devoted to the multi-disciplinary study of the complex problems of the coastal zone. The purpose of CERF is to help translate and interpret coastal issues for the public and to assist professional research and public information programs. The Foundation specifically supports and encourages field and laboratory studies on a local, national, and international basis. Through the medium of scientific publications, television, and radio CERF brings accurate information to the public and coastal specialists on all aspects of coastal issues in an effort to maintain or improve the quality of shoreline resources.

Because CERF is concerned with broad environmental issues, our efforts concentrate on significant problems such as maintenance of good quality (potable) water with adequate supply, and hazards associated with potential beach erosion, flooding, and susceptibility of developed shorelines to storm surge and wave attack. By focusing attention on these potential man-made and natural hazards, it is hoped that our research efforts will help others improve the quality of life in diverse coastal areas. CERF thus aims to stimulate awareness of coastal (marine and freshwater shorelines) land and water problems; initiate and foster research and innovation to promote long-term coastal productivity; establish an educational forum for the debate of contentious coastal issues; and develop new principles and approaches for enlightened coastal management, and encourage their adoption and use.

Members are individuals that support the aims of the foundation through personal and group efforts or by donations. Memberships are available in different categories with privileges.

Editor-in-Chief
Charles W. Finkl Ph.D., CSc, CMarSci, FIMarEST, CPGS, CPSSc, PWS, MASCE

Dr. Charles W. Finkl is President and Executive Director of the Coastal Education and Research Foundation (CERF), publisher of the JCR. Charlie, a founding editor of the Journal of Coastal Research, has served as Editor-in-Chief for the past 34 years. He is a Research Professor in the Department of Geosciences at Florida Atlantic University in Boca Raton, Florida. He received Science degrees from Oregon State University and the Ph.D. from the University of Western Australia. He is a member of more than 20 professional societies and has published more than 200 professional papers, books, and reports. He is a Chartered Marine Scientist (CMarSci) [Institute of Marine Engineering, Science and Technology], Certified Professional Geological Scientist (CPGS) [American Institute of Professional Geologists (AIPG)], Certified Professional Soil Scientist (CPSSc) [American Registry of Certified Professionals in Agronomy, Crops, and Soils], and a Professional Wetland Scientist (PWS) [Society of Wetland Scientists]. Charlie has field experience in parts of the USA, Caribbean area, Brazil, Honduras, Russia, South Africa, Western Europe, Australasia, and South Pacific islands. He is also the Series Editor of the Encyclopedia of Earth Sciences Series that is published by Springer (Germany). There are more than twenty-eight volumes in the Series and about twenty-five are available online. Charlie also serves on the Editorial Board of the International Journal of Environmental Studies (Routledge) and is an occasional peer reviewer for many other professional journals.

Charlie has interests and expertise in the general areas of surficial geology, coastal and marine geomorphology (including coastal classification), coastal/marine biophysical environments, exploration geology, soils and weathering (regolith geology), coastal zone management and engineering applications or impacts on natural systems (including erosion control and shore protection), coastal hydrology including submarine freshwater and mineralized seeps, subsurface and marine structural geology, natural hazard mitigation in coastal zones, marine environments and coastal wetland protection and restoration, and remote sensing (e.g., land cover classification in coastal wetlands, advection-diffusion turbidity plumes in coastal waters, delineation of bottom types and sand resources), effluent disposal and pollution of wetlands and estuaries, water resources mapping and conservation, time series studies of wetland hydroperiod and soil moisture.

International Coastal Symposium (ICS)
Official Meeting of CERF

The International Coastal Symposium (ICS) was originally set up by Per Bruun (deceased) and Charlie Finkl as the official meeting of the Coastal Education and Research Foundation (CERF), and the first meeting being held in Hilton Head, South Carolina, in 1993. After the repeated success of these meetings, CERF moved the ICS to the international scene holding these conferences in conjunction with local sponsors in Australia, Brazil, Iceland, New Zealand, Northern Ireland, Poland, and Portugal. The ICS brings together delegates from all over the world to collaborate and discuss the most current coastal research studies and projects. During the ICS 2014, which was held in Durban, South Africa, a grand celebration took place to mark the 30th Anniversary of CERF and the ICR. Our next ICS meeting is scheduled for May of 2018 in Busan, South Korea. For more information, please visit www.cerf-jcr.org.
Aims and Scope of the Journal

Journal of Coastal Research, an International Forum for the Littoral Sciences, is dedicated to all aspects of coastal research. These include geology, biology, geomorphology (physical geography), climate, littoral oceanography, hydrography, coastal hydraulic environments, environmental (resource) management, engineering, and remote sensing. Although each field functions effectively within its own parapet, the cross-disciplinary nature of coastal studies requires familiarity with each field as well. Hence, the scope of topics is necessarily broad in order to address the complexity of coastal biophysical and socio-economic interactions. Because of the wide range of interrelated topics, the journal invites original contributions and manuscripts dealing with theory, methodology, techniques, and field or applied topic studies on interdisciplinary coastal issues.

The journal encourages the dissemination of knowledge and understanding of the coastal zone by promoting cooperation and communication among specialists in different disciplines. Natural scientists, for example, are encouraged to collaborate with professionals in other fields to prepare contributions relating to the coastal zone that foster increased appreciation of coastal environments and processes. By means of this journal, with its scholarly and professional papers, systematic review articles, book and symposia reviews, communications and news, and special topical issues, an international forum for the development of integrated coastal research is provided.

RIVERS AND ESTUARIES

Sedimentary Processes of Barrier-Lagoon System in the Nakdong River Estuary, Busan, South Korea
Han Jun Woo, Jun-Ho Lee, Jeongwon Kang, and Jae Ung Choi

Seasonally Hypersaline Estuaries in Semiarid Climate Regions: an Example from the Northeast Brazil
S. S. Valentim, M.O. B. Menezes, and C. E. P. Teixeira

The Modelling Approach for Predicting Coastal Pollutions using Rainfall Distributions over Different Land Use/Land Cover
Hun-Kyun Bae

On the Response of Shallow-water Tidal Regime by Geological Characteristic of Waterway and Man-made Structures in a Macrotidal Estuary: Han River Estuary (Korea)
Byung Il Yoon and Seung-Buhn Woo

Influence of Kuroshio Path on Salinity Distribution in Seto Inland Sea
Shinya Nakashita, Heeeun Woo, Kyeongmin Kim, Kyungho Kim, In-Cheol Lee, Dong-Sun Kim, and Tadashi Hibino

Monitoring of the Changjiang River Plume in the East China Sea using a Wave Glider
Taejun Moh, Jin Hyung Cho, Seom-Kyu Jung, Sang-Hyun Kim, and Young Baek Son

Modeling the Processes that Control Fine Sediments Transport in the Río de la Plata Estuary
Claudia G. Simionato and Diego Moreira

Elemental (C/N Ratios) Isotope Compositions (δ13CTOC and δ15NTN) of Surface Sediments from the Barrier Islands in the Nakdong River Estuary, South Korea
Jun-Ho Lee, Kap-Sik Jeong, Dong-Hun Lee, Kap Song Park, and Han Jun Woo

Spatio-temporal Changes of Sediment Environment in the Taehwa River Estuary, Ulsan of Korea
Bo-Ram Sim, Hyung Chul Kim, Chung-Sook Kim, Dong-Woon Hwang, Jung-Hyun Park, Yoon-Sik Cho, Sokjin Hong, and Won-Chan Lee

The Monitoring of Topography Change in the Estuary of the Korean East Coast Using LiDAR
Sungduk Kim, Hojin Lee, Kyewon Jun, and Byong-Hee Jun

Bathymetry Estimation by Orbital Data of OLI Sensor: A Case Study of the Rio Grande Harbor, Southern Brazil
Deivid Cristian Leal Alves, Jean Marcel de Almeida Espinoza, Miguel da Guia Albuquerque, Marine Bastos da Silva, José Scott Fontoura, Christian Serpa, and Jair Weschenfelder

On the Inverse Relationship between Concentration and Size of Cohesive Sediment
Minwoo Son, Fabián A. Bombardelli, Byeoungeun Park, and Jisun Byun

Investigation of the River Mouth Topography Change by the Response Characteristics of River Discharge and Ocean Waves at Yoneshiro River
Kazuya Watanabe and Kohei Kumagai

Integrated High-resolution Numerical Model for the NW Iberian Peninsula Coast and Main Estuarine Systems
Magda C. Sousa, Américo S. Ribeiro, Marisela Des, Renato Mendes, Ines Alvarez, Moncho Gomez-Gesteira, and João M. Dias

3-D Numerical Investigation on Effect of Flow Structure and Water Level on Vegetation Distribution in an Open Channel
Ho Seong Jeon, Dong Soo Hur, Jong Ryul Park, Jong Sung Yoon, In Ho Kim, and Woo Dong Lee

The Influence Of Seasonality On Haline Zones In An Amazonian Estuary
Micaela Valentim, Sury Monteiro, and Marcelo Rollnic

Influence of tide on salt entrapment in the River Mojuim Estuary
Mauricio S. Costa, Adriano S. Rocha, Arthur S. Santos, and Marcelo Rollnic

Analysis of Physical Habitat Change for Target Fish Induced by Extended Floodplain
Il Hong, Ji sung Kim, Kyu Ho Kim, Hyoung Sub Shin, and Ho Seong Jeon

Sedimentological Sectorization Model In An Amazonian Estuary
Herbert Junior Campos Peixoto, Lizandra Pantoja Baia, Débora Rodrigues Pereira, Marcelo Rollnic, and Sury de Moura Monteiro

Evaluation of Mixing and Stratification in an Estuary of Korea
Nam-Hoon Kim, Jin Hwan Hwang, and Dong Hyeon Kim

Using Geostationary Ocean Color Imager to Map the Diurnal Dynamics of Suspended Sediment Concentration in Estuary Area
Yanyan Kang, Xianrong Ding, and Xiaoping Ge
