BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-o-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

CORRECTION . . .

This correction is for the following article by Frasca et al. (1997) entitled "Mycoplasmal conjunctivitis in a European starling," which appeared in the *Journal of Wildlife Diseases*, Volume 33(2), pages 336–339. Due to an editorial error an incorrect statement was included in the Abstract of this article. The erroneous phrase is part of the sentence which begins on line 9 of the Abstract and reads, "However, the histologic lesions were distinct, by the presence of ulceration and epithelial hyperplasia and lacking a lymphoplasmacytic infiltration." The corrected statement

should read, "However, the histologic lesions were distinct, by the presence of ulceration and by the absence of epithelial hyperplasia and lymphoplasmacytic infiltration."—S. Frasca, Jr.,^{1,2} Lynn Hinckley,² Mark H. Forsyth,³ Timothy S. Gorton,² Steven J. Geary,² and Herbert J. Van Kruiningen^{1,2} ¹Northeastern Research Center for Wildlife Diseases and ²Department of Pathobiology, University of Connecticut, 61 North Eagleville Road, U-89, Storrs, Connecticut 06269-3089, USA; ³Department of Medicine, Division of Infectious Diseases, Vanderbilt University, Nashville, Tennessee 37232-2605, USA.
