BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Editors: Eye on Education: Cathy Lundmark (educationoffice@aibs.org); Feature articles: Cathy Lundmark (features@aibs.org); Washington Watch: Robert E. Gropp (publicpolicy@aibs.org).

Editorial Board: Agriculture: Sonny Ramaswamy; Animal Behavior: Janice Moore; Animal Development: Paula Mabee; Botany: Kathleen Donohue; Cell Biology: Randy Wayne; Ecology: Scott Collins; Daniel Simberloff; Ecotoxicology: Judith S. Weis; Education: Charlene D'Avanzo; Environmental Microbiology: Rita R. Colwell; Environmental Policy: Gordon Brown, J. Michael Scott; Evolutionary Biology: James Mallet; Genetics and Evolution: Martin Tracey; History and Philosophy: Richard M. Burian; Human Biology: David L. Evans; Invertebrate Biology: Kirk Fitzhugh; Landscape Ecology: Monica Turner; Mammalogy: David M. Leslie Jr.; Microbiology: Edna S. Kaneshiro; Molecular Biology: David Hillis; Molecular Evolution and Genomics: David Rand; Neurobiology: Cole Gilbert; Plant Development: Cynthia S. Jones; Policy Forum: Eric A. Fischer; Population Biology: Ben Pierce; Professional Biologist: Jean Wyld; Remote Sensing and Computation: Geoffrey M. Henebery; Statistics: Kent E. Holsinger; Vertebrate Biology: Harvey B. Lillywhite.

BioScience (ISSN 0006-3568; e-ISSN 1525-3244) is published 11 times a year (July/August combined) by the American Institute of Biological Sciences, 1900 Campus Commons Dr., Suite 200, Reston, VA 20191, in collaboration with the University of California Press. Periodicals postage paid at Berkeley, CA, and additional mailing offices. **POSTMASTER:** Send address changes to *BioScience*, University of California Press, Journals and Digital Publishing, 2000 Center Street, Suite 303, Berkeley, CA 94704-1223, or e-mail customerservice@ucpressjournals.com.

Membership and subscription: Individual members, go to www.aibs.org/aibs-membership/index.html for benefits and services, membership rates, and back issue claims. Subscription renewal month is shown in the four-digit year-month code in the upper right corner of the mailing label. Institutional subscribers, go to www.ucpressjournals.com or e-mail customerservice@ucpressjournals.com. Out-of-print issues and volumes are available from Periodicals Service Company, 11 Main Street, Germantown, NY 12526-5635; telephone: 518-537-4700; fax: 518-537-5899; Web site: www.periodicals.com.

Advertising: For information about display and online advertisements and deadlines, e-mail adsales@ucpressjournals.com. For information about classified placements and deadlines, contact Jennifer A. Williams, AIBS (jwilliams@aibs.org).

Copying and permissions notice: Authorization to copy article content beyond fair use (as specified in sections 107 and 108 of the US Copyright Law) for internal or personal use, or the internal or personal use of specific clients, is granted by the Regents of the University of California on behalf of AIBS for libraries and other users, provided that they are registered with and pay the specified fee through the Copyright Clearance Center (CCC), www.copyright.com. To reach the CCC's Customer Service Department, call 1-978-750-8400 or e-mail info@copyright.com. For permission to distribute electronically, republish, resell, or repurpose material, and to purchase article offprints, use the CCC's Rightslink service on Caliber at <http://caliber.ucpress.net>. Submit all other permissions and licensing inquiries through the University of California Press's Rights and Permissions Web site, www.ucpressjournals.com/reprintinfo.asp, or e-mail journalspermissions@ucpress.edu.

Organisms from Molecules to the Environment

American Institute of Biological Sciences

Change Is Constant

Scientists love dynamic environments. After all, the goal of the scientific enterprise is to constantly improve how we understand and describe our world; we thrive on new insights, and most of us would be bored to tears were we denied the thrill of discovery and change.

Nonetheless, we often struggle to keep up with some changes, from the pace of discovery in fields other than our own to the ever-developing methods for teaching new generations of students. Some of the most striking changes we encounter occur in the institutions that have traditionally nurtured and supported science. Decreasing budgets and increasing expectations are driving rapid and far-reaching changes in universities, institutes, funding agencies, and publishers. The goals of the scientific enterprise aren't changing, but almost everything surrounding our pursuit of those goals is.

Scientific societies such as AIBS are also facing profound changes, and many are struggling to adapt to them. Once upon a time, scientific societies were the backbone of the enterprise (with apologies to all biologists who do not study vertebrates): They published the journals in which we reported new results and offered our reviews and syntheses; they hosted the meetings at which we exchanged our newest ideas and plans; and they gave us a voice in national discussions of science education, science policy, and research priorities. Today's picture is different; there is a wide variety of models for scientific publishing, the costs and constraints of travel have changed how we view the traditional scientific meeting, and the atomizing of the biological community by discipline has made it unclear whether any society can speak for biologists as a whole.

Scientific societies remain uniquely positioned, in principle, to play essential roles in advancing the causes of research, education, and enlightened policy. The challenge is how to fulfill those roles in societal and budgetary environments that are different from anything we have seen before. In my term as AIBS president, I have begun guiding AIBS toward defining how we can better serve the life science community, and how to develop the financial and structural means to sustain that activity. AIBS staff are in the midst of a strategic planning process to meet these challenges, and I lead the long-range planning committee that is overseeing the effort. After my presidential term ends I will continue to chair the long-range planning committee for two subsequent years.

Redefining a sense of identity for AIBS is a large endeavor, but it is necessary: Dynamic environments are exhilarating only if we keep up with them. There is an enormous pool of scientific and educational talent in the life science community, and we must find innovative ways to act together so that talent may shine and succeed in a rapidly changing world. AIBS can lead the kind of collective effort that is needed, and the goal of the strategic and long-range planning processes is to ensure that AIBS will always continue to do so.

JOSEPH TRAVIS
AIBS 2010 President
