THE CONDOR ONLINE: Access the Cooper Ornithological Society's website, [www.cooper.org](http://www.cooper.org), to find tables of contents and abstracts for issues from February 2001 through the forthcoming issue, in English and Spanish. The COS website also provides prospective authors with current instructions for authors.

In the first study of the natural history of the Slender-billed Parakeet (*Enicognathus leptorhynchus*), endemic to central Chile, Carneiro et al. (pp. 166–172) found that, at multiple spatial scales, radio-tracked juveniles used farmland and pastures with high densities of scattered mature trees disproportionately, highlighting the value of such trees to native fauna in an area devoted to agriculture.
