BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at <u>www.bioone.org/terms-of-use</u>.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

## ERRATUM

In *Condor* 109(4), November 2007, equations in the paper "Approximating variance of demographic parameters using the delta method: a reference for avian biologists" by Larkin Powell contained errors by the author.

Table 1 contained an error in the example given for the variance of the function  $\theta^{1/7}$ . The corrected formula for the variance is

$$\frac{1}{49 \cdot \sqrt[7]{\theta^{12}}} \cdot \operatorname{var}(\theta) \cdot$$

Table 3, as corrected, is:

TABLE 3. Approximations for sampling variance of survival estimates, by the delta method, when changing the scale of temporal units.

<sup>&</sup>lt;sup>a</sup>Error in variance formula in paper as originally published. The corrections have been included in the online variance calculator available at http://snr.unl.edu/powell/research/research.htm. The author regrets this error and is grateful to K. Pearson and C. Jennelle for their helpful suggestions and review of the corrections.
