BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

REVIEWERS FOR VOLUME 107

The Cooper Ornithological Society and the editorial staff of *The Condor* wish to thank the following 364 individuals who served as reviewers of manuscripts between 1 August 2004 and 31 July 2005. Reviewers who read two or more manuscripts are marked with an asterisk.

Josh Ackerman, David G. Ainley, Cameron L. Aldridge, Alexandre Aleixo, Angela D. Anders, Peter Arcese*, Todd W. Arnold, Jennifer M. Arnold, Lee Asheimer, Jonathan L. Atwood, Bradley Bakken, Richard C. Banks, George Barrowclough, Stuart Bearhop, Bruce M. Beehler, James R. Belthoff, Louis B. Best, Keith L. Bildstein*, Tim Birkhead, Jeff Black, Robert B. Blair, Clint W. Boal, Carl E. Bock, Kimberly S. Bostwick, Alice Boyle, Gerald T. Braden, David A. Brandt, Clait E. Braun, Leonard Brennan, Vincent Bretagnolle, Joel Bried, Donald J. ERRATUM

In *Condor* 107/3 (August 2005), the paper “Blood metabolite and corticosterone levels in breeding adult pied flycatchers,” by Michael Kern et al., contained a copyediting error. On p. 674, the second paragraph of “Perspectives” should read as follows (correction highlighted in boldface): “The metabolites that are most useful in this regard are (1) triglycerides, whose titers increase when a bird fattens and decrease when it fasts, and (2) free fatty acids, glycerol, and β -hydroxybutyrate, all of which **increase** during fasting.” The editors regret the error.
