The BioOne Digital Library (<https://bioone.org/>) provides worldwide distribution for more than 580 journals and eBooks from BioOne's community of over 150 nonprofit societies, research institutions, and university presses in the biological, ecological, and environmental sciences. The BioOne Digital Library encompasses the flagship aggregation BioOne Complete (<https://bioone.org/subscribe>), the BioOne Complete Archive (<https://bioone.org/archive>), and the BioOne eBooks program offerings ESA eBook Collection (<https://bioone.org/esa-ebooks>) and CSIRO Publishing BioSelect Collection (<https://bioone.org/csiro-ebooks>).

Your use of this PDF, the BioOne Digital Library, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Digital Library content is strictly limited to personal, educational, and non-commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne is an innovative nonprofit that sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

Frontispiece. Lesser Adjutant Storks (*Leptoptilos javanicus*) make a colony on a fig tree (*Ficus benghalensis*) whose girth measured 450 cm (main photo). Fig trees are not cut down by Nepali farmers because they are considered holy. This religious belief allows such scattered enormous trees to be retained in lowland Nepal, providing critical nesting habitat for waterbirds. Asian Openbills (*Anastomus oscitans*) form large colonies on contiguous canopies such as this one formed by a cluster of simal trees (*Bombax ceiba*) (inset). Simal trees are native to lowland Nepal and are also a common tree used in agro-forestry in the area. Nepali laws are allowing these trees to grow large, and waterbirds are able to use these trees for nesting for many years before they are cut down. Photos by Bijay Maharjan and Roshila Kaju.
