BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

ERRATUM

CORRECTION TO “WHOLE GENOME SHOTGUN SEQUENCES FOR MICROSATELLITE DISCOVERY AND APPLICATION IN CULTIVATED AND WILD *MACADAMIA* (PROTEACEAE)”

CATHERINE J. NOCK, MARTIN S. ELPHINSTONE, GARY ABLETT, ASUKA KAWAMATA,
WAYNE HANCOCK, CRAIG M. HARDNER, AND GRAHAM J. KING

Vol. 2 No. 4: 1300089, April 2014, doi:10.3732/apps.1300089

The authors discovered an error in a primer sequence reported in Table 1. The corrected primer sequence (locus Mac0010, reverse

primer sequence) is listed below in boldface. The authors apologize for the error. The published article (full-text and PDF) has been corrected.

TABLE 1. Correction to: Characterization of 12 polymorphic microsatellite loci developed in *Macadamia integrifolia*.^a

| Locus | Primer sequences (5'–3') | Repeat motif | Fluorescent label | Allele size range (bp) | T _a (°C) | GenBank accession no. |
|--------|--|---------------------|-------------------|------------------------|---------------------|-----------------------|
