On the cover

Cover: Painted Buntings (*Passerina ciris*) in an American Pokeweed (*Phytolacca americana*). Shipley et al. (pages 476–486) show that current bioclimatic and habitat factors do not explain the unusual gap in this species' breeding range. Rather, historical and biogeographic factors underlie this range disjunction. Original watercolor painting by Debby Cotter Kaspari.

INSTRUCTIONS TO CONTRIBUTORS

The Auk publishes original reports on the biology of birds. Appropriate topics include documentation, analysis, and interpretation of laboratory and field studies, theoretical or methodological developments, and reviews of information or ideas. Authors are encouraged to write papers from the perspective of general concepts and theories and to consider the relevance of their findings to taxa in addition to birds. *The Auk* publishes an original color painting on the cover of each issue; authors are encouraged to submit copies of suitable artwork. Contributions are welcomed from throughout the world but must be written in English. Submissions must be made online through ScholarOne at <http://mc.manuscriptcentral.com/ucpress- auk>. For instructions, please visit www.aou.org/auk/authors.php. Paying close attention to detail will help expedite the processing of your manuscript. For assistance with the ScholarOne system, please contact the Managing Editor (managingeditor@aou.org). Individuals with limited or no access to online submission should contact the Editor directly.
