In the course of determining if there was an update from what was presented by Coats and Phelps (1985), regarding Holland not being a signatory to the Convention on International Trade in Endangered Species (CITES), Robbins checked the CITES web page. Unfortunately, he only checked under "Holland" in the alphabetical listing, which is not listed and thus missed that "The Netherlands" had been a signatory since 1984. That should be corrected

on page 297 of our recent article on Red Siskins (*Auk* 120:291–298).
