BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at www.bioone.org/terms-of-use.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

DEDICATION

This Special Issue volume (Special Issue 59) of the *Journal of Coastal Research* is dedicated to our dear friend, colleague, and mentor Dr. Nicholas C. Kraus (1942-2011). Dr. Kraus was the Program Manager of the Coastal Inlets Research Program at U.S. Army Corps of Engineers Research and Development Center in Vicksburg, Mississippi for over a decade. As a world renowned researcher and educator, Dr. Kraus' tremendous contributions to coastal science and engineering range from basic theories on coastal hydrodynamics, sediment processes, and morphodynamics to broadly used engineering models and practice guidelines. He is a boundless inspiration to us all in the pursuit of new knowledge and innovative solutions to coastal problems. With great privilege and honor, we hereby pay tribute to this tireless leader in the coastal sciences by dedicating this Special Issue in his memory.

The Editors of the Special Issue 59, *Journal of Coastal Research* (2011)

ABOVE: Nick Kraus in Lund, 2001 when Nick received an honorary doctorate from Lund University, Sweden.
