BioOne Complete (complete.BioOne.org) is a full-text database of 200 subscribed and open-access titles in the biological, ecological, and environmental sciences published by nonprofit societies, associations, museums, institutions, and presses.

Your use of this PDF, the BioOne Complete website, and all posted and associated content indicates your acceptance of BioOne's Terms of Use, available at <u>www.bioone.org/terms-of-use</u>.

Usage of BioOne Complete content is strictly limited to personal, educational, and non - commercial use. Commercial inquiries or rights and permissions requests should be directed to the individual publisher as copyright holder.

BioOne sees sustainable scholarly publishing as an inherently collaborative enterprise connecting authors, nonprofit publishers, academic institutions, research libraries, and research funders in the common goal of maximizing access to critical research.

## Notes on early land plants today 76. Validity and re-instatement of *Cheilolejeunea evansii*

## Lars Söderström, Anders Hagborg and Matt von Konrat

L. Söderström (https://orcid.org/0000-0002-9315-4978) (lars.soderstrom@ntnu.no), Dept of Biology, Norwegian Univ. of Science and Technology, Trondheim, Norway. – A. Hagborg (https://orcid.org/0000-0001-8390-319x) and M. von Konrat (https://orcid.org/0000-0001-9579-5325), Gantz Family Collections Center, The Field Museum, Chicago, IL, USA.

*Cheilolejeunea evansii* (Tayl.) R.M.Schust. was excluded from the World Checklist of Hornworts and Liverworts (WCL; Söderström et al. 2016) since it was considered an invalid name. A closer look at the publication reveals that this is not the case. Although Schuster (1980) did not state that it was a new combination, a full and clear reference to the basionym was given. The name has been used and the taxon recognized several times in recent literature, so we here re-instate it pending further taxonomic investigation. It has only been reported from North and South Carolina, USA.
