

Supplementary Figure S1. Image of *Praesagittifera naikaiensis* and PCR products using primers mICOLintF/HCO2198 and *P. naikaiensis* gDNA. **(A)** A mature adult of *P. naikaiensis*. Yellow eggs are observed in the center of body. **(B)** Electrophoresis of the products of PCR using primers mICOLintF/HCO2198 and *P. naikaiensis* gDNA. PCR products were observed at the expected position in the gel image (367 bp).
