

Supplementary Fig. S1. Comparison of the number of pulsed call sequences between recording systems A and B. The number of Type-1 sequences for #F1 and that of all sequences for the conspecifics are represented by closed and open black circles, respectively. The number of Type-1 sequences for #F3 and that of all sequences for her conspecifics are represented by closed and open grey triangles, respectively. The dotted line is straight with a slope of 1.0.
