#### SUPPLEMENTAL MATERIAL 2

#### NEST DISTRIBUTION OF FOUR PRIORITY RAPTOR SPECIES IN COLORADO

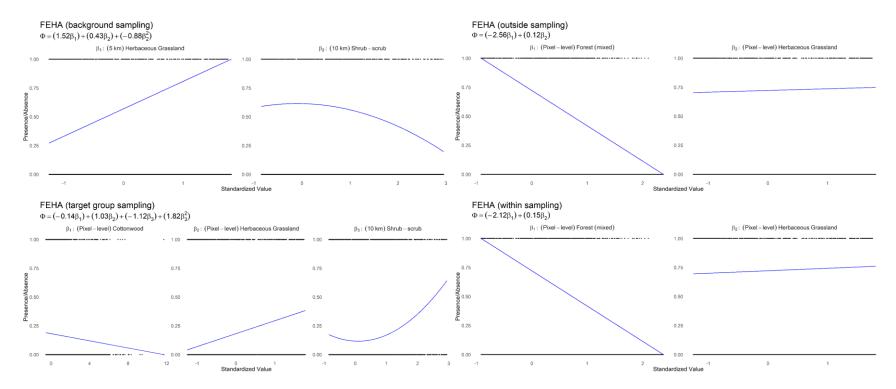

KEVIN AAGAARD, REESA YALE CONREY, AND JAMES H. GAMMONLEY

Colorado Parks and Wildlife, 317 W Prospect Road, Fort Collins, CO 80526 USA

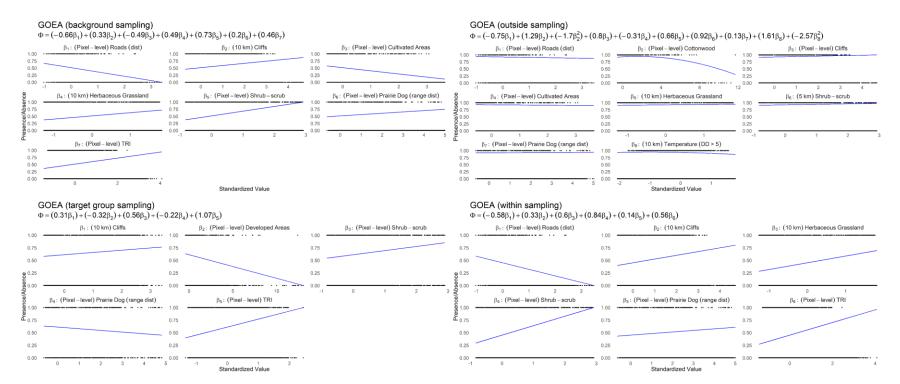

Supplementary Figure 2.1.  $\phi$  is the relative probability of use, each  $\beta$  is a covariate. Blue lines represent the partial regression estimate, taking either a linear form  $(y \sim x)$  or a quadratic form  $(y \sim x + x^2)$ , depending on the best-fitting association of each covariate to the response. "Pixel-level" is  $1 \text{ km}^2$ .

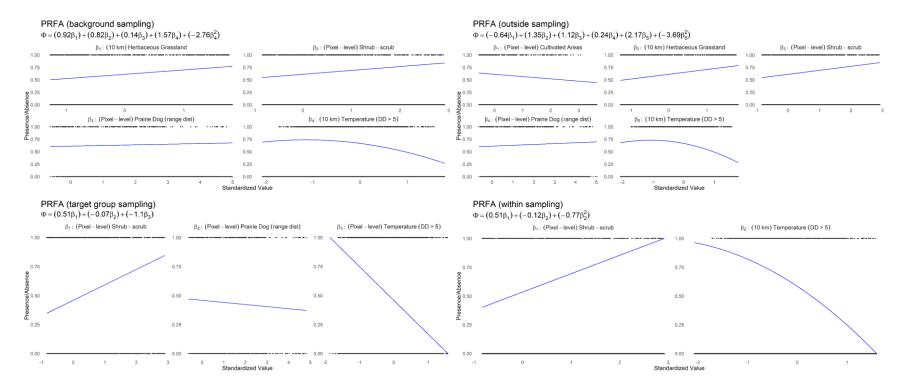

# Supplementary Figure 2.2.

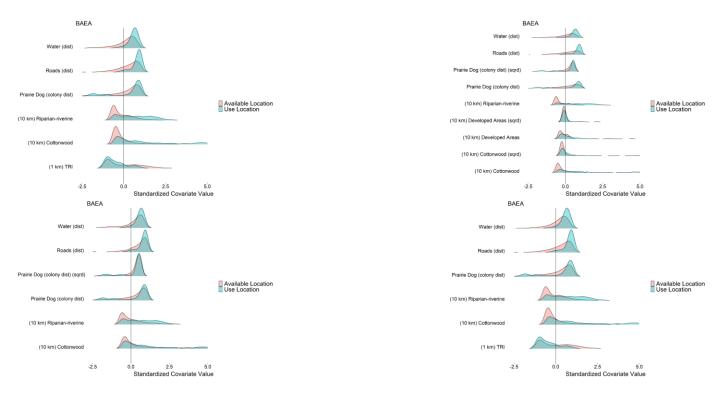

### Supplementary Figure 2.3.

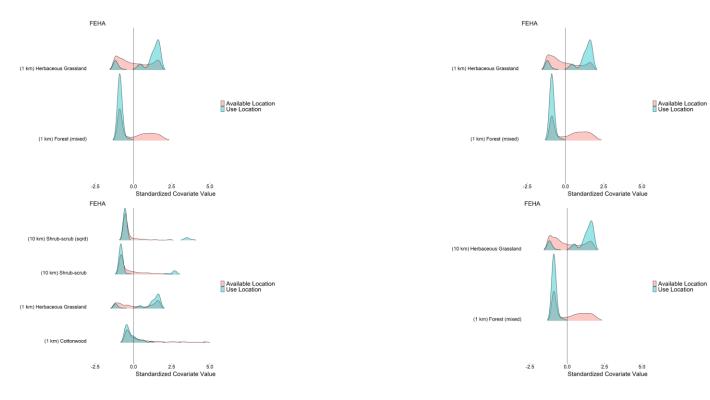

# Supplementary Figure 2.4.

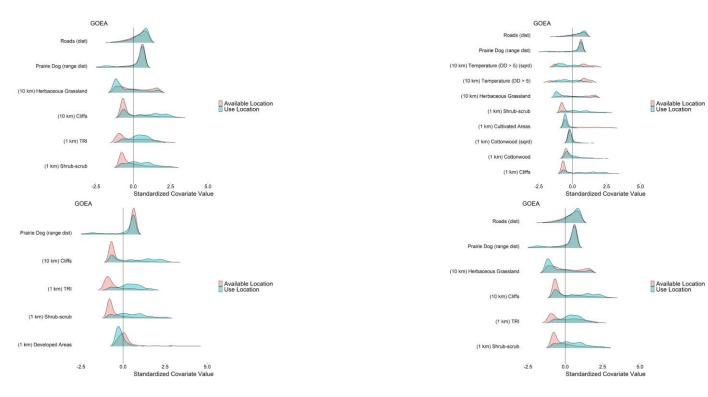

# Supplementary Figure 2.5. Bald Eagle (clockwise from top left: background, outside, within, target group)

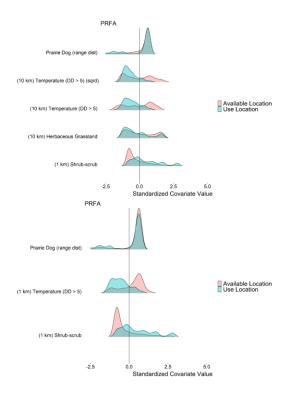

# Supplementary Figure 2.6. Ferruginous Hawk (clockwise from top left: background, outside, within, target group)

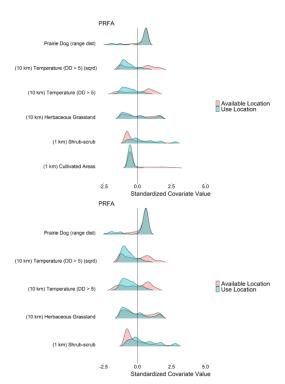

## Supplementary Figure 2.7. Golden Eagle (clockwise from top left: background, outside, within, target group)

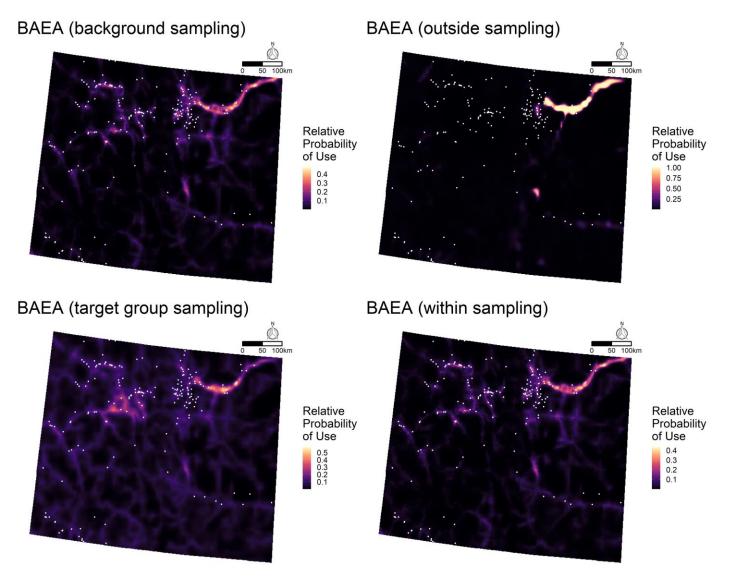

# Supplementary Figure 2.8. Prairie Falcon (clockwise from top left: background, outside, within, target group)

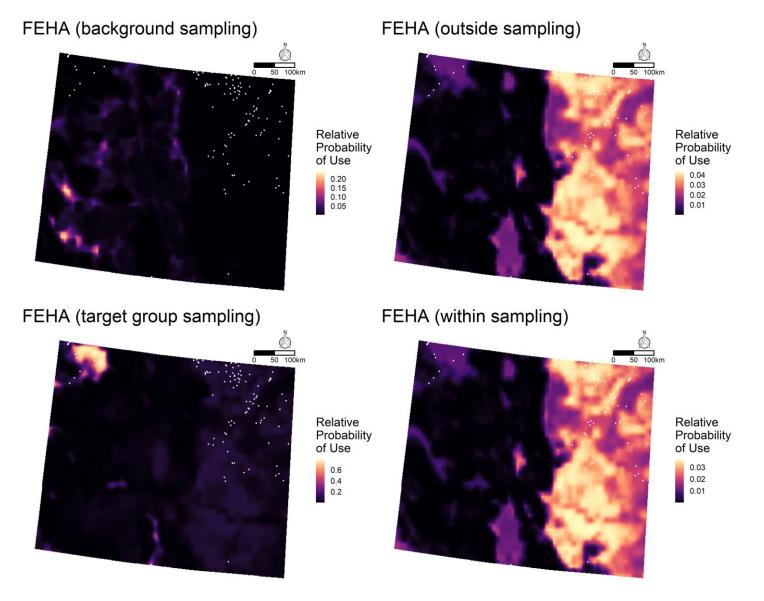

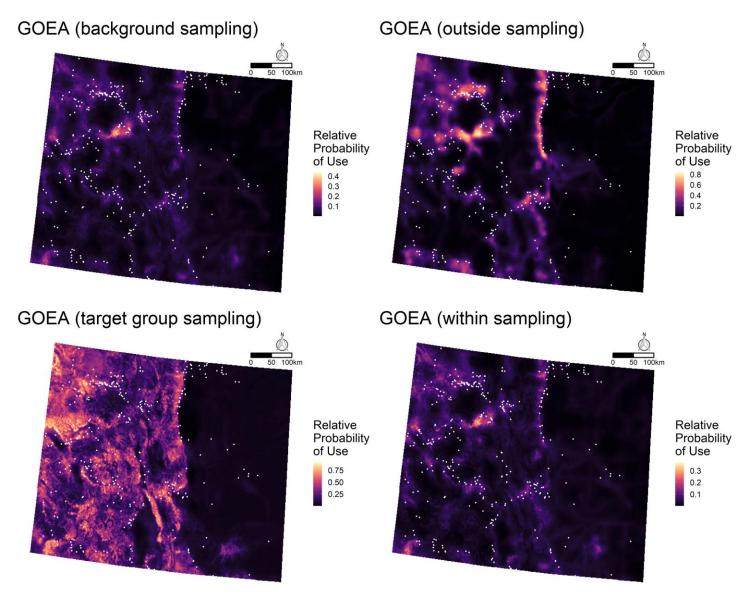

# Supplementary Figure 2.9. Bald Eagle

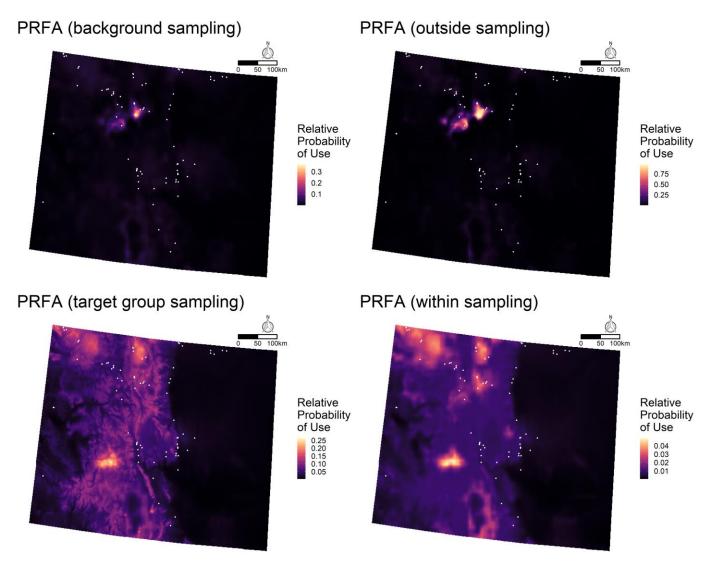

## Supplementary Figure 2.10. Ferruginous Hawk

# Supplementary Figure 2.11 Golden Eagle

# Supplementary Figure 2.12. Prairie Falcon

Supplementary Figure 2.13. BAEA = Bald Eagle; FEHA = Ferruginous Hawk; GOEA = Golden Eagle; PRFA = Prairie Falcon. Not all variables evaluated were supported in the final model; see Fig. 2). These density plots demonstrate the high degree of fidelity among covariate distributions across selection frames.
