Toponyms used in botanical works and on herbarium labels referring to Albania in its modern sense with their precise geographical location.

Most toponyms in Albania are known in various spellings depending on the foreign botanist's first language and capacity for listening to the Albanian informant. The definite and indefinite forms of Albanian nouns and the use of diacritical signs have increased the number of spelling variants.

Widely accepted spellings are printed in **boldface**; alternative spellings are given [in square brackets].
